NURSEYMEN

HORTICULTURISTS

LANDSCAPE ARCHITECTS

NO JOB OR ORDER TOO SMALL

Let Us Help You Plan

A WELL-PLANNED and planted home is the cherished hope of every American family. Pleasing and satisfactory results are only attained through a careful study of your grounds, the selection and planting of the proper material. Hundreds of Kentucky homes, both large and small, have been successfully landscaped from plans and service rendered by our firm. Because of our knowledge, experience and training we are in a position to serve you well. Satisfactory results are assured at surprisingly low cost.

LET US HELP YOU

No Charge for Consultation at Nursery

There are no charges for consultation or suggestions at the nursery. If you will bring your plans, measurements, pictures, etc., we will be pleased to give you valuable assistance.

Making of Plans

As the time required to make a plan depends on so many things, it is impractical to give an estimate unless we have sufficient information. Where simple plans are required locally we make no charge when we furnish the nursery stock. In cities close by we make no charge for a plan if the resultant business justifies the trip. This matter can be discussed when on the grounds.

Where consultation or advice only is requested out of the city we will be glad to furnish this at a nominal fee, based on distance and time required.

We make many plans for customers who cannot come to the nursery or who live too far distant to justify a personal call. If you will send the dimensions of your property, location of house (with blue prints if possible), the direction it faces, trees, drives, walks and a Kodak picture we can usually make a very satisfactory plan. For detail plans through the mail we ask a deposit of \$5.00 which will be deducted when at least \$50.00 worth of stock is purchased. For simple suggestions through correspondence there are no charges and we are always ready and pleased to render such service.

When to Plant

Shade Trees, Shrubs, and Fruit Trees, when handled with bare roots, are best planted in the fall after we have had sufficient frost to kill the foliage, or in the spring when dormant.

Evergreens, Shade Trees and Shrubs, when dug Balled and Burlapped (BGB), may be planted almost any time during the year if you can give them proper attention such as watering, cultivation and mulching.

Asparagus and Small Fruits may be planted in the fall if there is sufficient moisture and your soil is in good condition, otherwise plant in early spring.

Liberal Payment Plan

While we sell for cash, credit will be extended to responsible customers with satisfactory references. For those who want to buy or plant and cannot pay all at one time we will be glad to arrange a deferred payment plan. Tell us about how much you want to spend, how much you want to pay at a time and no doubt suitable arrangements can be made.

No Agents

We sell direct and our contacts are usually made by appointments. Refuse to buy from anyone who represents himself or herself as our agents. **WE HAVE NO AGENTS.** When dealing direct you get full benefit of our facilities.

Hillenmeyer's Beautiful Evergreens

"The Green-Robed Senators of Mighty Woods"—Keats

FOR beauty both winter and summer, the Evergreen has no equal. Succeeding in almost any soil, with their range of color, form and habit of growth they find a place in almost any landscape. Our trees are all several times transplanted, and the finest to be had.

All Evergreens are Dug with Ball of Earth and Burlapped (B&B)

Abies - Fir

"I remember, I remember
The Fir trees dark and high;
I used to think their slender tops
Were close against the sky."—HOOD

ABIES concolor (Silver or White Fir). The best of all the Firs. A native of the Rockies and requires a well-drained location. Has a deep root system and will withstand droughts and heat better than most Evergreens. The color ranges from a blue-green to a distinct blue. Not quite as showy as the Blue Spruce but a much better tree for Southern conditions. Sometimes irregular in growth when young but develops into a compact conical specimen. The needles are arranged around the branches. We consider it one of the outstanding evergreens in cultivation for either a specimen or grouping.

	Each
2½ to 3 ft.	\$ 5.00
3½ to 4 ft.	6.00
4 to 5 ft.	7.50

LARGE SPECIMENS AT NURSERY

12 to 13 ft.	\$35.00
13 to 14 ft.	40.00
14 to 15 ft.	50.00

A. nordmanniana (Nordmann Fir). A beautiful, stately tree with horizontal branches; deep green lustrous needles above, silvery beneath.

	Each
2½ to 3 ft.	\$ 5.00
3 to 3½ ft.	6.00
3½ to 4 ft.	7.50

Chamaecyparis - False Cypress

A group of beautiful Evergreens including some of the most unique and interesting trees in cultivation. Valuable in garden or foundation planting. Prefers a moist acid soil but will grow almost anywhere when not too dry or alkaline.

C. pisifera (Sawara Cypress). The foliage somewhat resembles that of the Arbor-vitae except that the tree is more graceful. Light green, silvery beneath, and of erect growth. Can be used in foundation planting or as a specimen.

C. pisifera aurea (Golden Sawara Cypress). Has all the characteristics of the preceding except that the foliage is of a lighter green and is bordered with yellow in early spring.

C. pisifera plumosa (Plumed Cypress). Feathery green foliage, broad, symmetrical and dense. Stands shearing well.

Prices of the foregoing 3 Chamaecypari:

	Each
2½ to 3 ft.	\$4.00
3 to 3½ ft.	4.50
3½ to 4 ft.	5.00
4½ to 5 ft.	6.00

C. pisifera squarrosa veitchi (Veitch's Mossy Cypress). A distinct form with short pale blue-green needles, slightly bent toward the branchlets. The appearance is a soft, mosslike tree of irregular habit and of picturesque beauty.

	Each
2 to 2½ ft.	\$3.50

C. pisifera filifera (Thread-Branched Cypress). One of the best dwarf Evergreens. Unusual foliage, drooping and graceful, resembling cords of green. Compact; fine in color both winter and summer.

	Each
2½ to 3 ft.	\$4.00
3 to 3½ ft.	5.00

Juniperus - Juniper

JUNIPERUS communis ashfordi (*Ashford's Juniper*). Columnar with silvery green foliage. Much like Irish Juniper except not quite so compact or pointed and larger in diameter. Holds color well in winter.

Each	Each
3 1/2 to 4 ft.\$5.00	4 to 5 ft.\$6.00

J. communis depressa plumosa (*Purple Spreading Juniper*). A very low spreading variety which lies close to the ground. In summer it has a silvery reflex to the otherwise gray-green foliage. In fall and winter assumes a purplish cast that is unusual in Evergreens. Fine for rockeries or low planting.

Each	Each
18 to 24 in.\$3.50	2 to 2 1/2 ft.\$4.00

J. communis hibernica (*Irish Juniper*). A distinct, slender, columnar form with glaucous green foliage. The numerous upright branches are closely adpressed. Its formality is invaluable where a narrow plant must or should be used. Needs no shearing.

Each	Each
3 1/2 to 4 ft.\$4.00	5 to 6 ft.\$6.00
4 to 5 ft.5.00	

J. chinensis compacta. A low, compact, spreading form of Juniper pfitzeriana, which does not grow so large. Can be used in more restricted areas.

Each	Each
15 to 18 in.\$3.50	18 to 24 in.\$4.00

J. chinensis pfitzeriana (*Pfitzer Juniper*). The most popular of all the spreading Junipers. The branches grow horizontally with slightly drooping terminals. The foliage is a bright gray-green which is retained throughout the winter. Desirable because of its form, hardiness, color and ability to grow in almost any location.

Each	Each
18 to 24 in.\$3.50	2 1/2 to 3 ft.\$5.50
2 to 2 1/2 ft.4.50	

J. excelsa stricta (*Spiny Greek Juniper*). An unusually attractive, dwarf, pyramidal Evergreen with compact, bluish green foliage. A valuable small, compact plant which can be used on either side of steps, walks or planted in urns.

Each
15 to 18 in.\$3.00

J. virginiana globosa. A compact, globe form of rich green color, which can be kept within bounds with little pruning. Desirable.

Each	Each
2 1/2 to 3 ft.\$5.00	3 to 3 1/2 ft.\$6.00

J. virginiana burki (*Burk's Silver Juniper*). A silvery blue, compact, upright form of merit. Stands shearing well and is much prized for foundation planting.

J. virginiana canaerti (*Canaert Juniper*). A fine, rather compact, pyramidal variety with tufted dark green foliage which is retained throughout the winter. Can easily be kept in bounds by slight pruning. Frequently has attractive silvery blue berries. Valuable for foundation plantings.

J. virginiana glauca (*Blue Juniper*). A rather loose growing variety which can and is usually kept formal by pruning. Its attractive blue-green foliage makes it stand out in any planting.

J. virginiana hilli (*Hill's Dundee Juniper*). A pyramidal, compact growing Evergreen of much merit. Bluish green foliage in spring, changing to plumlike color in early autumn. Stands shearing well. Excellent for formal planting.

J. virginiana keteleeri (*Keteleer's Cedar*). A fairly compact, pyramidal tree, well proportioned as to height and spread. Its large, slate-colored berries form a distinct contrast against the lighter, "fleshy" green foliage. Excellent for foundation or specimen. Will grow well in almost any soil.

Prices of preceding 5 Junipers:	Each
3 1/2 to 4 ft.	\$4.50
4 to 4 1/2 ft.	5.50
4 1/2 to 5 ft.	6.50
5 to 6 ft.	7.50

Juniperus Pfitzeriana

Juniperus Virginia Hilli

Juniperus Excelsa Stricta

Juniperus Communis Hibernica

Juniperus Virginiana Glauca

Pinus - Pine

*Lord, let me be a Pine that lifts its hands up high
To grasp the subtle secrets of the sky.—Edna DeRan*

This grand family of Evergreens stands at the top of economic importance. It is symbolical of strength, endurance and perseverance. It has been forever in the mind of man as evidenced by its place in literature, art and commerce. There are many forms, but the large, rugged, cone-bearing varieties are the ones which are of such importance. They do not like city conditions of soot, smoke and dust but are at home in the great outdoors. When small they are more or less compact and shapely, but as they develop, age brings a charm and beauty which few trees possess. They will grow in almost any well-drained soil. Plant Pines for permanency and beauty.

PINUS griffithi (*Himalayan Pine*). A beautiful bluish green variety with spreading branches and pendulous foliage. Looks like a much refined white Pine. Makes a wonderful specimen for the lawn.

Only available in large specimen—see below.

P. montana mughus (*Mugho Pine*). An excellent dwarf Pine, globe-shaped, with erect branches. It is especially attractive in the spring, when the new growth, which looks like miniature candles, completely covers the tree.

	Each
18 to 24 in. wide	\$4.00
2 to 2 1/2 ft. wide	5.00
2 1/2 to 3 ft. wide	6.00
3 to 3 1/2 ft. wide	7.50

P. resinosa (*Red or Norway Pine*). A valuable large, quick growing tree, useful as a specimen or for screening. Needles 4 to 6 inches, glossy green. Hardy and holds a good color throughout the winter.

Only available in large specimen—see below.

P. strobus (*White Pine*). One of our most beautiful native Evergreens, growing into a tall, majestic specimen. Needles 3 to 4 inches long, soft and flexible. Grows well on both dry and moist soil. It is a beautiful object planted alone and we think it one of the most desirable of our ornamental Evergreens.

	Each
4 to 5 ft.	\$ 5.00
5 to 6 ft.	6.00
6 to 7 ft.	8.00
7 to 8 ft.	10.00

P. sylvestris (*Scotch Pine*). One of the best. Very quick to re-establish itself, vigorous, and has ability to grow luxuriantly on high and dry ground. Its needles are shorter than either White or Red Pine, its habit more compact, the foliage dark green.

	Each
2 to 3 ft.	\$3.00
3 to 4 ft.	4.00

LARGE SPECIMENS AT NURSERY OF ABOVE EXCEPT PINUS MUGHUS

	Each
8 to 9 ft.	\$12.50
9 to 10 ft.	15.00
10 to 11 ft.	20.00
11 to 12 ft.	25.00

Picea - Spruce

PICEA glauca (*White Spruce*). A very hardy Evergreen with light green foliage and similar in many respects to the Norway Spruce, except that it is decidedly slower growing in our locality and can be used where a medium sized or more compact tree is wanted.

	Each		Each
2 1/2 to 3 ft. ...	\$3.50	4 to 4 1/2 ft. ...	\$5.00
3 to 3 1/2 ft. ...	4.00	4 1/2 to 5 ft. ...	6.00
3 1/2 to 4 ft. ...	4.50		

P. abies (*Norway Spruce*). The most popular of all the Spruce. Tall, pyramidal, of rapid growth, with horizontal branches and dark green foliage. A very graceful tree, extensively planted and of great adaptability. Valuable as a specimen, for grouping or as windbreaks.

	Each		Each
2 to 2 1/2 ft. ...	\$2.50	4 to 4 1/2 ft. ...	\$4.50
2 1/2 to 3 ft. ...	3.00	4 1/2 to 5 ft. ...	5.00
3 to 3 1/2 ft. ...	3.50	5 to 6 ft. ...	6.00
3 1/2 to 4 ft. ...	4.00	6 to 7 ft. ...	7.50

P. orientalis (*Oriental Spruce*). Slow growing, compact, with dark rich green foliage. Excellent for foundation planting.

	Each		Each
2 1/2 to 3 ft. ...	\$5.00	3 1/2 to 4 ft. ...	\$7.50
3 to 3 1/2 ft. ...	6.00	4 to 5 ft. ...	10.00

P. pungens (*Colorado Spruce*). A noble tree native to the Rockies. Rather formal with close, stiff branches. Color varies from light to dark green.

	Each		Each
2 1/2 to 3 ft. ...	\$3.00	3 1/2 to 4 ft. ...	\$5.00
3 to 3 1/2 ft. ...	4.00	4 to 5 ft. ...	6.00

P. pungens kosteriana (*Koster Blue Spruce*). Sorry, sold out.

Pinus Sylvestris

Pseudotsuga - Fir

PSEUDOTSUGA douglasii (*Douglas Fir*). Soft green foliage, resembling the Hemlock or Spruce, but of a blue cast. Makes a compact tree, and can be used as a specimen or in group plantings.

	Each		Each
3 to 4 ft.	\$4.00	6 to 7 ft.	\$8.00
4 to 5 ft.	5.00	7 to 8 ft.	10.00
5 to 6 ft.	6.00		

QUALITY as well as PRICE should be considered in buying Evergreens.

Ours are acclimated and freshly dug.

Experts Tell Us

We have the finest Evergreens to be found in any nursery. Seeing is believing.

*Residence in Blue Ridge Acres. (William Mitchell, owner.)
This attractive house was built to sell and found a buyer soon after being planted by Hillenmeyer*

Pinus Montana Mughus

Taxus Hedge

TAXUS cuspidata (Spreading Yew). Low, spreading type which is usually broader than high. Can be pruned into compact form to look like Boxwood or made into a hedge if desired. Withstands heat and cold and is perfectly hardy in our climate. Can be grown in sun or shade. One of the finest spreading Evergreens.

15 to 18 in.	Each \$4.00	2 to 2½ ft.	Each \$6.50
18 to 24 in.	5.00	2½ to 3 ft.	8.00

T. cuspidata browni (Brown's Yew). A selected seedling of *Taxus cuspidata*. Normally grows about 1½ times in height to spread. Needles short, compact and of good deep, rich green. Excellent for hedge or specimen. Can easily be pruned into globe form.

18 to 24 in.	Each \$5.00	2½ to 3 ft.	Each \$8.00
2 to 2½ ft.	6.50		

T. cuspidata capitata (Upright Yew). An upright, cone-shaped form of medium growth. Desirable for foundation planting or hedge. The most desirable variety of this type.

2½ to 3 ft.	Each \$ 7.00	4½ to 5 ft.	Each \$15.00
3 to 3½ ft.	8.00	5 to 5½ ft.	17.50
3½ to 4 ft.	10.00	5½ to 6 ft.	20.00
4 to 4½ ft.	12.50	6 to 7 ft.	25.00

T. cuspidata nana (Dwarf Yew). Of extremely slow growth, forming a low, irregular and picturesque outline. Can be used as a specimen, hedge or dwarf edging.

15 to 18 in.	Each \$5.00
-------------------	-------------

The place to buy Evergreens is from the nurseryman who grows them. We have no agents.

Large Trees

In addition to the stock listed we have many large, fine specimens which will give immediate effect, at moderate cost. Why wait a lifetime for results? Write or consult us.

Taxus - YEW

An Outstanding Evergreen

NO family of Evergreens has gained such popularity in recent years as the Yew. Their dark, rich color, hardiness, variety of form, ease to transplant, adaptability, general freedom from disease or insects has merited this position. They all do well in the shade. We have one of the largest stocks in the South, and are using it in quantities for foundation planting and to replace Boxwood, which so often freeze.

TAXUS cuspidata vermeulen (Vermeulen Yew). An upright, vase-shaped type of unusual character. Its irregular, rather open formation is quite distinct. Good green color throughout winter. You will be pleased with it where an informal plant is desired.

2 to 2½ ft.	Each \$5.00	3 to 3½ ft.	Each \$7.50
2½ to 3 ft.	6.00		

T. media hatfieldi (Hatfield Yew). A rather dwarf, compact, columnar form with upright branches. Good dark green color. Excellent for low, narrow hedge or to plant in a restricted area.

15 to 18 in.	Each \$4.00	2 to 2½ ft.	Each \$6.00
18 to 24 in.	5.00	2½ to 3 ft.	7.50

T. media hicksi (Hicks' Yew). A semi-upright type which can be pruned into different forms such as a globe, column or as a hedge. Dark, rich green throughout the winter.

2 to 2½ ft.	Each \$5.00	3½ to 4 ft.	\$10.00
2½ to 3 ft.	6.00	4 to 4½ ft.	12.50
3 to 3½ ft.	7.50

Taxus Capitata

Tsuga - HEMLOCK

The All-Purpose Evergreen

THIS grand tree has more uses than any Evergreen we sell. The fact that it grows rather rapidly, can be pruned almost any shape, will tolerate both sun and shade, good color winter and summer, and is graceful, has made it a standout.

While Hemlocks prefer a good, rich, moist soil, they will grow almost anywhere. Keep well watered immediately after transplanting.

We have one of the largest and finest stocks in the entire country. We have a saying, "When in doubt plant a Hemlock."

EVERGREEN QUALITY

Every Evergreen has been transplanted to increase the root system, and sheared to make it compact. Height does not indicate compactness and shapeliness, nor does price indicate VALUE — seeing is believing!

- Hedge
- Screen
- Specimen
- Foundation

Tsuga Canadensis

Tsuga Canadensis
—Hemlock

SCREEN

While Hemlocks are usually not so rapid in growth as the Pines and Spruces, they will soon develop into large, compact trees. If given good soil and ample moisture, a screen of Hemlock will soon surprise and delight the most fastidious. There is nothing more beautiful or satisfactory than a planting of Hemlock, be it a single row, large masses, a small cluster or even a single tree.

SPECIMEN

As a specimen, many consider Hemlock our handsomest Evergreen. Certainly there are few which retain the grace, dignity, and beauty of the entire tree from base to tip as the Hemlock. Small or large they are beautiful. If permitted to grow with little pruning the pendulous twigs drooping from the rather horizontal branches give a form which is dignified yet graceful. Yes, as a specimen we recommend a Hemlock.

HEDGE

While a great many plants have been used from time to time in making hedges, there is none for all-round purposes which is superior to the Hemlock. Its rich green color in winter or summer, softness of texture, compactness, hardiness, ability to thrive in shade or open exposure, freedom from disease are some of its outstanding qualities. Our trees have been several times transplanted, and every one is a specimen. Can furnish in heights from 2 to 10 feet. Should be planted three feet apart or more, depending on size.

FOUNDATION PLANTING

Few trees are better adapted to foundation work than the Hemlock. While it will sometimes grow rather large if not restrained by pruning, it still can be kept within bounds very easily. They can be shaped into columnar, pyramidal or globular forms. Their graceful soft foliage is of good color and the trees will grow almost anywhere both in shade or sun if given a reasonable amount of moisture.

Tsuga - Hemlock

Suggested Doorway Planting

Thuja - ARBOR-VITAE

One of the most popular and extensively planted Evergreens. The branches are flat or grow in layers. To many, they are known as "pressed Cedars." While they prefer a moist soil or ample water they will grow almost anywhere. They vary in color from green to yellow and in shape from globe to pyramidal.

THUJA occidentalis (Eastern Arbor-Vitae). One of the best. Light green in early spring and turning dark rich green during the summer. Pyramidal, compact, vigorous and can be used in foundation plantings, hedges or as specimens.

	Each
2 to 2½ ft.	\$2.50
2½ to 3 ft.	3.00
3 to 3½ ft.	3.50
3½ to 4 ft.	4.00
4 to 5 ft.	5.00
5 to 6 ft.	6.00
6 to 7 ft.	7.50

T. orientalis aurea nana (Berckmann's Golden Arbor-Vitae). A beautiful, dwarf, compact variety of golden color. Valuable for urns, small gardens, cemetery lots or brightening up foundation plantings. Grows about twice in height to width.

	Each
15 to 18 in.	\$3.00
18 to 24 in.	4.00
3 to 3½ ft.	7.00
3½ to 4 ft.	8.00

T. occidentalis elegantissima (George Peabody Arbor-Vitae). A golden pyramidal form which is quite conspicuous in contrast to the green varieties.

	Each
3 to 4 ft.	\$4.00
4 to 5 ft.	5.00

T. orientalis elegantissima (Yellow Column Arbor-Vitae). A comparatively rapid growing Oriental variety with bright yellow color throughout the year. Desirable for contrast.

	Each
2 to 3 ft.	\$3.50
3 to 4 ft.	4.00
4 to 5 ft.	5.00
5 to 6 ft.	6.00

Thuja Orientalis Aurea Nana

T. occidentalis globosa (Globe Arbor-Vitae). Usually develops into a perfect, globe-shaped plant, the spread equaling the height. The foliage is light green and attractive. They are largely used for front-line planting, in urns, vases, on either side of a step and in formal work where symmetry is desired.

	Each
12 to 15 in.	\$2.00
15 to 18 in.	2.50
18 to 24 in.	3.00
2 to 2½ ft.	4.00

T. occidentalis pyramidalis (Pyramidal Arbor-Vitae). Strikingly attractive, narrow at its base, and retaining its shape without shearing. The color is deep, rich green. Like all Arbor-Vitae is easy to transplant. For corners, in front of pillars, background of group plantings and in urns, no dwarf Evergreen is quite so popular.

	Each
2 to 2½ ft.	\$2.50
2½ to 3 ft.	3.00
3 to 3½ ft.	3.50
3½ to 4 ft.	4.50
4 to 5 ft.	5.00
5 to 6 ft.	6.00

Thuja Orientalis Elegantissima

Thuja Occidentalis Globosa

APARTMENT BUILDING, DUKE ROAD. M. W. ANDERSON
This modern and attractive apartment was given the "Hillenmeyer Touch." As the trees and plants develop they will add more beauty and increase in value.

Broadleaf Evergreens

SO MANY home owners do not know what this title means! Think of the Hollies and the Laurels as examples. We would miss the glossy green foliage of the Broad-Leaved Evergreens in early spring, the deeper colors of summer, and the cheerful contrast they give to dull winter scenes, if they were removed from our landscape. They may be used as specimens, foundation plantings with tall evergreens or in the shrub border. You will be delighted with their beauty all the year—and pleased with the plants we supply.

B&B means the roots are in a ball of earth wrapped in burlap—the safest and best way of moving all Evergreens.

Euonymus Patens

Abelia - Bush Arbutus

ABELIA grandiflora (*Glossy Abelia*). A desirable, medium growing semi-evergreen shrub for foundation planting, filling corners, curves or can be used as a hedge. The small, glossy leaves remain on most of the winter. Small, dainty blush-white blossoms are borne on rather arching branches from May until frost. We like Abelia.

Each	Each
18 to 24 in., B&B .. \$2.00	2 to 2½ ft., B&B \$2.50

Berberis - Barberry

B. mentorensis (*Mentor Berberis*). A patented, semi-evergreen Barberry which is being much used as a specimen or hedge. Upright in growth, vigorous and hardy. The leaves usually color in the fall but seldom remain on all winter.

SPECIMEN

Each	Each
2½ to 3 ft., B&B .. \$3.00	3 to 3½ ft., B&B \$4.00

HEDGE

3	12	3	12
15 to 18 in., \$1.50	\$4.50	18 to 24 in.	\$2.00 \$6.00

Buxus Sempervirens

(Common Box)

With lustrous, green foliage, it is a plant that can be used in many ways and lends an air of dignity and permanence to its surroundings. As a hedge it gives character; in an informal group it has no rivals; it may be clipped or trained to pyramid form, globe shape or allowed to grow naturally. Box is used freely in window boxes, urns and for garden edgings. Should be planted in good soil and fed with sheep or cow manure. Cultivate lightly and do not disturb the roots.

SPECIMEN PLANTS

Each	Each
15 to 18 in., B&B \$4.00	2 to 2½ ft., B&B \$7.50
18 to 24 in., B&B 5.00	2½ to 3 ft., B&B 10.00

Euonymus

EUONYMUS patens (*Kiautschovicus*) (*Spreading Euonymus*). A valuable introduction from China. Leaves medium size, oblong, rich green, which persist throughout the winter. Small white flowers followed by coral berries similar to our native Bittersweet. A rather spreading shrub which will grow in either sun or shade. One of our most useful broad-leaf Evergreens.

Each	Each
15 to 18 in., B&B \$1.50	2½ to 3 ft., B&B \$3.00
18 to 24 in., B&B 2.00	3 to 3½ ft., B&B 4.00
2 to 2½ ft., B&B 2.50	

Ilex - Holly

ILEX crenata bullata (*Convex Leaf Holly*). A compact spreading evergreen shrub with arched branches and small convex leaves. Excellent for foundation planting or may be used as a hedge.

I. crenata rotundifolia. A rather dwarf spreading variety of Japanese Holly, with glossy, nearly round leaves. One of the hardiest of the species and excellent for foundation planting or hedge.

I. glabra (*Inkberry*). A rather loose growing evergreen shrub which will succeed in either sun or shade. Leaves turn a somewhat purple shade in the fall. When planted in mass the shining black berries are most attractive. One of the hardiest varieties.

Prices of above varieties of Ilex:

Each
18 to 24 in., B&B \$3.00

Loom and Needle Garden, Lexington, Kentucky
Henry Fletcher Kenney, Landscape Architect

Can you imagine anything more beautiful and enjoyable than this unique garden right in the center of "down-town" Lexington?

Ilex - Holly

ILEX opaca (*American Holly*). Our native Holly which supplies the garden with year 'round greenness and richness and is prized so much at Christmas time because of its large glossy leaves and striking red berries. Stands pruning well and can therefore be used as a specimen, in foundation plantings or as a hedge. Some trees bear berries (pistillate, female), while others (staminate, male) do not. It is necessary that you have a male Holly growing close by or one should be planted in every group for pollination. They will grow in partial shade or in the open.

	Non-berried	Berried
3 to 4 ft., B&B	\$ 5.00	\$ 7.50
4 to 5 ft., B&B	6.00	9.00
5 to 6 ft., B&B	8.00	12.00
6 to 7 ft., B&B	10.00	15.00
7 to 8 ft., B&B	12.00	18.00
8 to 9 ft., B&B	15.00	22.50

Mahonia

MAHONIA aquifolium (*Oregon Grape*). The thick, glossy leaves resemble Holly, but are much larger and most attractive. Makes a compact bush, and when pruned severely every few years will become an indescribable mass of green and bronze foliage. Yellow blossoms in June followed by blue-black berries. Thrives in shade.

15 to 18 in., B&B	Each \$2.00
18 to 24 in., B&B	2.50
2 to 2½ ft., B&B	3.00

Should any of your friends be interested in our catalog, please send in their names. A copy will be sent for the asking.

Mahoberberis

MAHOBERBERIS neuberti (*Mahonia Barberry*). An interesting hybrid which is a cross between Mahonia aquifolium and Berberis vulgaris. Often sold as Berberis illicifolia. This medium growing, almost evergreen shrub is hardy, vigorous and free of insects. Leaves toothed or spiny, somewhat resembling a Holly. We think it a most useful and desirable variety.

4 to 5 ft., B&B	Each \$5.00
5 to 6 ft., B&B	6.00

Nandina

NANDINA domestica. A semi-evergreen shrub with numerous, upright, reedlike stems. Each cane has a tuft of spreading light green foliage except the very young growth, which is tinted pink to copper. In August, white panicles of flowers appear, followed by masses of red berries in trusses. In autumn, strong coppery tints cover the foliage, making a most pleasing combination. While not entirely evergreen, it is nearly so.

18 to 24 in., B&B	Each \$2.50
2 to 2½ ft., B&B	3.00
2½ to 3 ft., B&B	3.50

Osmanthus

OSMANTHUS americanus (*Devilwood Osmanthus*). A rapid growing shrub with upright branches and open formation. The leaves are long and narrow and it has small, fragrant white or cream flowers. Not generally listed but we think it one of our best hardy broad-leaf shrubs.

3 to 4 ft., B&B	Each \$4.00
4 to 5 ft., B&B	5.00
5 to 6 ft., B&B	6.00

Abelia-Bush Arbutus (See page 7)

Prunus (Laurel Cherry)

PRUNUS caroliniana (*Carolina Laurel Cherry*). An attractive evergreen shrub with glossy, oval-like, green leaves and upright branches. Grows to a height of 7 to 9 feet. Very ornamental because of its good color.

4 to 5 ft., B&B	Each \$5.00	6 to 7 ft., B&B	\$7.50
5 to 6 ft., B&B	6.00		

P. laurocerasus schipkaensis (*Schipka Laurel Cherry*). Withstands more cold than any of the English Laurels, but will freeze from time to time. Its slick, glossy leaves are most attractive. A beautiful broad-leaf Evergreen.

15 to 18 in.	Each \$3.00
--------------	-------------

Pyracantha

PYRACANTHA coccinea lalandi (*Laland Firethorn*). A picturesque, upright, thorny shrub with boxlike evergreen foliage. Has attractive white flowers followed by fiery orange-red fruits which last well into the winter. May be used as a specimen but is particularly attractive when trained against a wall where the rich deep green foliage acts as a splendid foil for the amazing quantities of berries. A spectacular, yet dignified shrub, and one to be prized for your garden.

18 to 24 in., B&B	Each \$3.00	2 to 2½ ft., B&B	\$4.00
-------------------	-------------	------------------	--------

P. coccinea pauciflora (*Spurse Firethorn*). A low, compact, rather round-shaped plant with small, silvery leaves, orange berries and twiggy growth. Excellent for individual specimen or mass planting.

18 to 24 in., B&B	Each \$3.00	2 to 2½ ft., B&B	\$4.00
-------------------	-------------	------------------	--------

Viburnum

VIBURNUM rhytidophyllum (*Leather-Leaf Viburnum*). A vigorous shrub with large, thick, feathery leaves which are deeply veined. The foliage somewhat resembles the Rhododendron. Has clusters of small, yellowish white blossoms, followed by red berries changing to shining black as the season advances. Will grow in almost any location. A valuable ornamental plant.

2 to 3 ft., B&B	Each \$3.00	4 to 5 ft., B&B	\$5.00
3 to 4 ft., B&B	4.00		

V. burkwoodi (*Burkwood Viburnum*). A recent introduction and often called the "Evergreen Carlesii." The glossy, green leaves are retained most of the winter, though most of them will fall as spring approaches. The pink-tinged, white blossoms are borne in clusters and are exceedingly fragrant. An outstanding, hardy variety which merits a place in any garden or planting.

18 to 24 in., B&B	Each \$3.00	2 to 3 ft., B&B	\$4.00
-------------------	-------------	-----------------	--------

HOW TO PLANT

With every order we will send absolutely free a book which, by word and picture, will show just how to plant a tree or shrub. The instructions are clear, and if followed, your plants should grow and thrive. We send the booklet free with every order.

Viburnum Burkwoodi

Deciduous Trees

For Shade and Beauty

"No place is complete without trees. A home without trees is charmless; a road without trees is shadeless; a park without trees is purposeless; a country without trees is hopeless"

WHEN hot summer sun beats down, you long for the welcome shade of a Maple, an Oak, or a broad-spreading Elm. But to have and enjoy such shade and shelter, you must plant ahead. The trees must be planted in fall or spring when the weather is cool. Then the roots take hold, the tree flourishes, and in a surprisingly few seasons the outspreading branches give the protection you desire.

We can supply—at very low prices—large trees that will give immediate effect, as well as smaller specimens from 6 to 15 feet high, which need a little more time to develop after moving to your place. Our trees are well grown, root pruned, and transplanted several times; they are truly Hillenmeyer standard.

"He Who Plants a Tree, Plants for Posterity"

*There is no warrior who'll fight for life
More valiantly than a tree,
On rocky wind-swept ledge at mountain crests
Or on the fiercely elemental coastline by the sea.*
—R. H. Weisbrod.

Acer - Maple

A. *platanoides* (*Norway Maple*). A vigorous, dense, round-headed tree, valuable for street or lawn planting. The large dark green leaves turn a pale yellow in the fall. It resembles the Sugar Maple except the leaves are larger and it is not as tall growing. May be planted under electric or telephone wires, causing little interference. **Not available in 2½ in. size.**

A. *platanoides columnare* (*Column Norway Maple*). A valuable, new type of Norway Maple with upright habit of growth. For street planting, accent plant or background it should prove quite popular. Has regular Norway foliage.

A. *platanoides schwedleri* (*Schwedler Maple*). Similar to the Norway, except in early spring the foliage is a bright purple, changing to bronze and then to dull green. In the fall it turns bronze before defoliating. **Only available in 1¼ in., 1½ in., and 1¾ in.**

A. *rubrum* (*Red Maple*). A native tree which is not appreciated and one of the most attractive as a lawn specimen. The current season's growth is bright red in winter. Flowers and seed pods are red, appearing before the leaves, which in fall vie with the Oaks, Sassafras, Gum, Sumac, or Sugar Maples for magnificence in color.

A. *saccharum* (*Sugar Maple*). Known everywhere and extremely popular. The tree grows to great size, erect, conical form, is perfectly hardy, withstands any subnormal weather conditions, and is adaptable to nearly all types of soil. The tree yields valuable timber, as well as maple sugar. Foliage is deep green, turning to indescribable colors in the fall.

Prices 5 above:	Each
7 to 9 ft., 1¼ in. cal.	\$4.00
8 to 10 ft., 1½ in. cal.	5.00
10 to 12 ft., 1¾ in. cal.	6.00
12 to 14 ft., 2 in. cal.	7.00
12 to 15 ft., 2½ in. cal.	9.00

A. *saccharinum* (*Silver Maple*). Because of its quick growth and good foliage, this tree is in great demand. The leaves appear early in spring, are light green on the upper side, silvery beneath, and remain until late fall. Small flowers open before the leaves appear. For planting as temporary trees—that is, alternate between the hard-wooded and slower growers, such as Oaks, Elms, Sugar Maples, Gums, etc., the Silver Maple is highly recommended.

	Each
7 to 9 ft., 1¼ in. cal.	\$3.00
8 to 10 ft., 1½ in. cal.	3.50
10 to 12 ft., 1¾ in. cal.	4.50
12 to 14 ft., 2 in. cal.	5.50
12 to 15 ft., 2½ in. cal.	7.00

HEIGHT OF SHADE TREES

The approximate height of shade trees to their diameter is as follows:

1¼"	7 to 9 ft.
1½"	8 to 10 ft.
1¾"	10 to 12 ft.
2"	12 to 14 ft.
2½"	12 to 15 ft.

However, the Diameter is the Determining Factor

Acer Platanoides Norway Maple

Acer Platanoides Schwedleri—Schwedler Maple

Betula Pendula Alba—European White Birch

DECIDUOUS TREES—continued

Sugar Maple—Acer Saccharum

Aesculus - Horse Chestnut

AESCULUS carnea (Red Horse-Chestnut). A handsome round-headed tree with red or scarlet flowers borne in panicles 6 to 8 inches long. Much prized for this highly ornamental feature. Trees must be grafted and are rather scarce.

5 to 6 ft.	Each \$5.00	7 to 8 ft.	Each \$10.00
6 to 7 ft.	7.50	8 to 9 ft.	12.50

A. glabra (Ohio Buckeye). A native round-topped tree of good habit. Cream blossoms borne in clusters 5 to 6 inches long.

5 to 6 ft.	Each \$3.00	7 to 8 ft.	Each \$5.00
6 to 7 ft.	4.00	8 to 9 ft.	6.00

Betula - Birch

BETULA pendula alba (European White Birch). Tree of moderately quick growth, erect, with terminal branches slightly drooping. Bark almost white. As a specimen, and especially contrasted with evergreens, it makes a valuable tree for the lawn. Prefers a moist place, but will do well on dry ground.

7 to 8 ft., 1 1/4 in. cal.	Each \$4.00
8 to 9 ft., 1 1/2 in. cal.	5.00
9 to 10 ft., 1 3/4 in. cal.	6.00
10 to 11 ft., 2 in. cal.	7.00
11 to 12 ft., 2 1/2 in. cal.	9.00

Moving a Maple in Full Leaf, July 9th

We are equipped to transplant large trees, 20 to 40 feet, and while best done in the dormant period, we often move in full leaf. If interested in saving 10 to 20 years, and getting immediate effect, consult us.

B. pendula laciniata (Cut-leaf European White Birch). A weeping form of the European White Birch. Inclined to be rather pyramidal when young but as it matures develops a broad top. Its small pendulous branches eventually almost touch the ground. Because of its deeply serrated leaves, white bark and weeping habit, it is one of our most highly prized trees for small lawns, cemetery lots, planted as a specimen or in groups.

6 to 7 ft.	Each \$5.00
7 to 8 ft.	6.00
8 to 9 ft.	7.50

B. papyrifera (Paper or Canoe Birch). A handsome, medium growing tree with creamy white, paper-like bark and pendulous branches. While native to the northern states, does well in Kentucky. The small, ovate, serrated leaves turn yellow in fall.

7 to 8 ft., 1 1/4 in. cal.	Each \$4.00
8 to 9 ft., 1 1/2 in. cal.	5.00
9 to 10 ft., 1 3/4 in. cal.	6.00
10 to 11 ft., 2 in. cal.	7.00

Carpinus - Hornbeam

CARPINUS betula pyramidalis (Pyramidal European Hornbeam). A much prized, narrow, compact, stately tree of columnar habit and Beech-like foliage. It is tough—will tolerate city conditions, transplants kindly and holds its leaves most of the winter. Stands clipping remarkably well and for this reason can be used for a tall hedge pillars, or on either side of an entrance. Clipped or unclipped it attracts attention. We have some beautiful specimens and can think of no more appropriate gift to a friend than one or a pair of these beautiful specimen trees.

6 to 7 ft., B&B	Each \$6.00
7 to 8 ft., B&B	7.50
8 to 9 ft., B&B	10.00
10 to 12 ft., B&B	15.00
12 to 15 ft., B&B	20.00

C. caroliniana (Hornbeam or Blue Beech). This attractive, slow growing tree deserves wider planting. In foliage it resembles the native Beech but is much more compact and graceful. The terminal growth has a reddish cast, and foliage colors scarlet to orange-yellow in the fall. Fine where a small, compact specimen is wanted.

6 to 7 ft.	Each \$4.00
7 to 8 ft.	5.00
8 to 9 ft.	6.00
9 to 10 ft.	7.00
10 to 12 ft.	9.00

Castanea - Chestnut

CASTANEA mollissima (Chinese Chestnut). Small symmetrical tree, valuable for shade or nuts. With our native variety practically extinct this will take its place. Foliage beautiful in summer changing to yellow in fall. Fruits early and prolifically and is of good quality.

4 to 5 ft.	Each \$2.00
5 to 6 ft.	3.00
6 to 7 ft.	5.00

Celtis - Hackberry

CELTIS laevigata (Sugar Hackberry). The Hackberry is one of the best trees. It is not rapid in growth, but is comparatively free of disease and reaches a height of 75 to 100 feet. Grows on either dry or wet soil, and the fruits are attractive to birds and children.

7 to 9 ft., 1 1/4 in. cal.	Each \$4.00
8 to 10 ft., 1 1/2 in. cal.	5.00
10 to 12 ft., 1 3/4 in. cal.	6.00
12 to 14 ft., 2 in. cal.	7.00
12 to 15 ft., 2 1/2 in. cal.	9.00

Cercis - Judas Tree

CERCIS canadensis (Eastern Redbud). Harbinger of spring, blooming in April, and literally covered with red or pink blossoms before the leaves appear. It is a small, shapely tree, with large, deep green leaves. May be used in heavy mass planting of shrubs, with white-flowering Dogwood or against Evergreens or white Birch, to furnish contrast.

3 to 4 ft.	Each \$1.50
4 to 5 ft.	2.00
5 to 6 ft.	2.50
6 to 7 ft.	3.00
7 to 8 ft.	4.00
8 to 9 ft.	5.00

C. canadensis alba (White Eastern Redbud). An unusual white form of our ordinary Redbud which is both distinctive and beautiful. The individual blossoms are about the same size and they open along with the type. Makes a distinctive gift to lovers of unusual trees. Grafted.

4 to 5 ft.	Each \$4.00
5 to 6 ft.	5.00
6 to 7 ft.	6.00
7 to 8 ft.	7.50

Balled and burlapped, 50% additional.

Cladrastis - Yellow-Wood

CLADRASTIS lutea (American Yellow-wood). So called because the wood was formerly used to make a yellow dye. A native tree of spreading habit with foliage generally resembling the Ash. It produces great drooping panicles of white pea-like blossoms not unlike Wistaria. Foliage brilliant yellow in autumn.

5 to 6 ft.	Each \$3.00
6 to 7 ft.	4.00
7 to 8 ft.	5.00
8 to 9 ft.	6.00

Let Hillenmeyer Help You Plan

MR. AND MRS. DAN BROCK
Paris Road, Lexington, Kentucky

It must give joy and pleasure to drive into an entrance such as this. The Taxus hedge will soon develop into a thick hedge and add further beauty to these grounds.

Cornus - Dogwood

"A Dogwood tree will be monument enough for me."—Irvin S. Cobb.

CORNUS florida (*White-Flowering Dogwood*). A native tree, well known to everyone, and beautiful all the year. Its large, white, single blossoms are conspicuous, coming early in the spring. The foliage is attractive all summer, and in the fall colors beautifully with red berries that hang on most of the winter. It can be used as a specimen, or in groups as a background for shrub borders. In contrast with bright, flowering trees like Redbud, it is especially showy.

2 to 3 ft., B&B	Each
3 to 4 ft., B&B	\$ 2.00
4 to 5 ft., B&B	3.00
5 to 6 ft., B&B	4.00

Feed Your Trees

Like other plants, trees should be fed for best results. See our Plant Foods listed on inside back cover.

Cornus—Dogwood

Diospyros - Persimmon

DIOSPYROS virginiana (*Persimmon*). 25 to 35 feet. Valuable both for shade and fruit. The foliage is glossy and shining, the coloring yellow in the fall. Its fruit is valued after frost time and is an old favorite. A tree too well known to describe.

6 to 7 ft., 1 1/4 in. cal.	Each
7 to 9 ft., 1 1/2 in. cal.	\$4.00
9 to 10 ft., 1 3/4 in. cal.	5.00

12 to 15 ft., 2 1/2 in. cal.	6.50
	8.00

Gleditsia - Honey Locust

GLEDITZIA triacanthos inermis (*Thornless Honey Locust*). A picturesque, fast growing, spreading tree with small compound leaves. Not dense enough to kill the grass beneath and is being much used as a lawn or street tree and is a substitute for the Elm.

1 1/4 in. cal.	Each
1 1/2 in. cal.	\$4.00
1 3/4 in. cal.	5.00
2 in. cal.	6.00
2 1/2 in. cal.	7.00
	9.00

Fagus—American Beech

Ginkgo Biloba - Maidenhair Tree

The Ginkgo is one of the oldest living things in the world. It is a hang-over from pre-historic ages and has no relatives in the plant kingdom. A tall, picturesque, hardy tree with horizontal branches and small maidenhair-fernlike leaves which usually hang in clusters of three or more from the branches. The foliage changes to golden yellow in the fall. A unique tree worthy of a place on any lawn.

7 to 8 ft., 1 1/4 in. cal.	Each
8 to 9 ft., 1 1/2 in. cal.	\$4.00
9 to 10 ft., 1 3/4 in. cal.	5.00
10 to 12 ft., 2 in. cal.	6.00
11 to 12 ft., 2 1/2 in. cal.	7.00
	9.00

MR. AND MRS. JESSE HOLBROOK
121 Tahoma Road, Lexington, Kentucky
"It's not a home until it's planted", could well be applied to the exterior of this attractive house. The trees and evergreens give it the "finishing touch."

Ginkgo Biloba—Maidenhair Tree

Prunus Divaricata—Purple-Leaved Plum

LARGE TREES

In addition to the stock listed we have many large, fine specimens which will give immediate effect, at moderate cost. Why wait a lifetime for results? Write or consult us.

Prunus—Flowering Cherry

DECIDUOUS TREES—Continued

Gymnocladus - Kentucky Coffee Tree

GYMNOCLADUS dioicus (*Kentucky Coffee Tree*). A native of noble proportions, growing rather irregular in shape, with blue-green foliage. Resembles the walnut tree. Fine for heavy clay soils.

	Each
7- 9 ft., 1 1/4 in. cal.	\$4.00
8-10 ft., 1 1/2 in. cal.	5.00
10-12 ft., 1 3/4 in. cal.	6.00
12-14 ft., 2 in. cal.	7.00
12-15 ft., 2 1/2 in. cal.	9.00

HALESIA, Silver Bell. See page 20.

Juglans - Walnut

JUGLANS cinerea (*Butternut*). This native tree is one of the most prized of the nut-bearing trees. It is rapid in growth, quickly making a round-headed tree. If you want nuts quickly, plant Butternuts.

J. nigra (*Black Walnut*). One of the noblest of our native forest trees; valued for timber and nuts.

Prices of Walnuts:	Each
6 to 7 ft., 1 1/2 in. cal.	\$2.50
7 to 8 ft., 1 3/4 in. cal.	3.00
8 to 9 ft., 2 in. cal.	4.00
10 to 12 ft., 2 1/2 in. cal.	5.00

Koelreuteria

(*Varnish Tree*)

KOELREUTERIA paniculata (*Panicled Golden Rain Tree*). Frequently called "Golden Rain Tree" because of the many yellow blossoms. It grows 20 to 30 feet high, and is of globular shape. In its young stages it is not so shapely but develops into an interesting specimen.

	Each
6 to 7 ft.	\$2.50
7 to 8 ft.	3.00
8 to 9 ft.	4.00
9 to 10 ft.	5.00

Larix - Larch

LARIX europaea (*European Larch*). A tall, conical tree with soft light green leaves which resemble the short needles of a pine. Valuable for screen or ornamental purposes. Among the first trees to start growth in the spring.

	Each
6 to 7 ft.	\$3.00
7 to 8 ft.	4.00
8 to 9 ft.	5.00
9 to 10 ft.	7.00
10 to 12 ft.	9.00

(Balling extra.)

Liquidambar

(*Sweet Gum*)

LIQUIDAMBAR styraciflua. Another native tree not appreciated. It is not of rapid growth nor especially easy to transplant, but the glossy foliage in summer, the brilliant color in the fall, and the unusual appearance of the young branches with corky bark in the winter are qualities which make it especially valuable.

	Each
7 to 9 ft., 1 1/4 in. cal.	\$4.00
8 to 10 ft., 1 1/2 in. cal.	5.00
10 to 12 ft., 1 3/4 in. cal.	6.00
12 to 14 ft., 2 in. cal.	7.00
12 to 15 ft., 2 1/2 in. cal.	9.00

Liriodendron - Tulip Tree

LIRIODENDRON tulipifera (*Tulip Tree*). Belongs to the Magnolia family, and is one of the finest native trees, growing to be very large, and bearing Tulip-shaped, yellowish blossoms. Its leaves are large and very dark green. Grows quickly when established.

	Each
7 to 9 ft., 1 1/4 in. cal.	\$4.00
8 to 10 ft., 1 1/2 in. cal.	5.00
10 to 12 ft., 1 3/4 in. cal.	6.00
12 to 14 ft., 2 in. cal.	7.00
12 to 15 ft., 2 1/2 in. cal.	9.00

(B&B extra)

Malus Zumi Calocarpa

Magnolia

MAGNOLIA macrophylla (*Bigleaf Magnolia*). An unusual tree with wide, stout branches, forming a broad, rounded top. The leaves are very large, sometimes measuring 9 to 10 inches broad and 20 to 30 inches long. Large, creamy white, fragrant flowers. A little difficult to transplant. Each

10 to 12 ft., 1 3/4 in. cal.	\$6.00
12 to 14 ft., 2 in. cal.	7.00
12 to 15 ft., 2 1/2 in. cal.	9.00

Best Balled and Burlapped for which the cost will be 40% additional.

M. tripetala (*Umbrella Magnolia*). A wide spreading tree with stout branches and large leaves, sometimes attaining a width of 8 to 9 inches and 15 to 20 inches long. Flowers creamy white, fragrant, and 8 to 10 inches across. A native tree to most of eastern Kentucky. Each

10 to 12 ft., 1 3/4 in. cal.	\$6.00
12 to 14 ft., 2 in. cal.	7.00
12 to 15 ft., 2 1/2 in. cal.	9.00

Magnolia—Other Varieties. See page 22.

Morus - Mulberry

MORUS alba tatarica (*Russian Mulberry*). This makes a round-headed tree, quick of growth and with profuse foliage. It is wonderfully productive, and for anyone wishing to attract birds and for chicken runs it cannot be surpassed. Fruit smaller than our native variety. Each

4 to 5 ft.	\$2.00	6 to 7 ft.	\$4.00
5 to 6 ft.	3.00		

Malus - Flowering Crab

The Flowering Crabs have few rivals among the gorgeous spring-flowering trees. They are hardy, of easy culture, and will thrive in almost any soil. They are available in many shades and when used as specimens or mass plantings are most effective. Many kinds bear very ornamental fruit. No lawn is complete without one of these gems.

- MALUS arnoldiana** (*Arnold Crab*). 10 to 15 ft. Large, soft pink flowers opening to an almost pure white. Conspicuous yellow and red fruit.
- M., Dolgo**. 15 to 20 ft. Compact in form. White flowers followed with conspicuous red, medium sized, edible fruit. Very showy in August.
- M. eleyi** (*Ely Crab*). 12 to 15 ft. The best of the purple or red-leaf Crabs. Covered in spring with clusters of large pink flowers, followed by showy purple-red fruit.
- M. Ellwangeriana**. 12 to 15 ft. Rather upright with pink flowers. Its brilliant red fruit with yellow blush in the fall is extremely showy.
- M. floribunda** (*Japanese Flowering Crab*). 12 to 15 ft. A small, spreading tree with graceful arching branches. Buds rosy red changing to light pink. Fruit reddish yellow and showy.
- M., Hopa** (*Red Flowering Crab Apple*). 18 to 20 ft. Strong, healthy, upright tree, rose-pink flowers. Fruit red inside and out.
- M. ioensis plena** (*Bechtel's Crab*). 12 to 15 ft. Rather slow grower with upright, spreading branches. Its double pink flowers resemble clusters of small Roses.
- M. scheideckeri** (*Scheidecker Crab*). 10 to 15 ft. Compact, upright growth with small, bright, single, rose blossoms borne in profusion. Fruit large and yellow. Good for jelly.
- M. zumi calocarpa**. The finest of all the white Crabs. The buds are pink but expand into lovely large white blossoms which literally cover the tree. Fruit small, bright red to orange.

Price of above Crabs:	Each	Each	
4 to 5 ft.	\$2.00	5 to 6 ft.	\$2.50

WE HAVE SOME BEAUTIFUL SPECIMENS OF MOST KINDS QUOTED AT NURSERY AS FOLLOWS:

FEED YOUR TREES

Like other plants, trees should be fed for best results. See our Plant food listed on inside back cover.

Prunus—Japanese Weeping Flowering Cherries

Fruit of Malus Dolgo

Malus—Flowering Crab

Soulangeana

Magnolia Soulangeana

DECIDUOUS TREES—continued

Platanus - Sycamore

PLATANUS occidentalis (*American Plane Tree*). Our native Sycamore which is not appreciated. However, if you want a tree of rapid growth, rugged in character, picturesque in winter with its white bark, you should not overlook this grand old tree. Fine for woodland and paddocks. Tolerant of soot and smoke, and therefore is much used as a street tree in cities.

7 to 9 ft., 1 1/4 in. cal.	Each	\$3.50
8 to 10 ft., 1 1/2 in. cal.	Each	4.50
10 to 12 ft., 1 3/4 in. cal.	Each	5.50

Populus - Poplar

POPULUS nigra italica (*Lombardy Poplar*). A tall, slender tree of rapid growth, reaching a great height and not to be confused with Carolina Poplar. Specimens often reach 50 feet, with a spread of less than 10 feet, and for this reason when trees are needed for narrow places, between buildings, congested lawns, narrow avenues, Lombardy Poplar may be used to advantage. Because of its great height and quick growth it is recommended for backgrounds, to add character to plantings or to offset straight or bare lines; for screening unsightly views, windbreaks—and for quick effects.

5 to 6 ft., 1/2 in. cal.	Each	\$1.00
6 to 7 ft., 3/4 in. cal.	Each	1.50
7 to 8 ft., 1 in. cal.	Each	2.00
8 to 9 ft., 1 1/4 in. cal.	Each	2.50
9 to 10 ft., 1 1/2 in. cal.	Each	3.00

P. alba bolleana (*Bolleana Poplar*). Just because the Carolina Poplar is an enormous weed and nothing more, one should not discriminate against all the Poplar family. Bolleana Poplar has glittering green leaves, silvered underneath, and makes an attractive display against the sky when they are set in motion by a gentle breeze. The bark is gray, giving a pleasing winter effect. It is a fast growing, slender columnar tree a little wider than Lombardy, which it resembles at a distance and for which it can be used as a substitute.

6 to 7 ft.	Each	\$2.00	9 to 10 ft.	Each	\$3.50
7 to 8 ft.	Each	2.50	10 to 12 ft.	Each	4.50
8 to 9 ft.	Each	3.00			

Prunus - Flowering Cherries

All except the large specimen listed below will be available in the spring only. We will accept orders and ship at proper season.

These beautiful flowering trees from the Orient are among the most decorative in cultivation. They are of medium growth, free of disease and will succeed almost anywhere. There are many species and horticultural forms. We have tested many kinds and the best are as follows:

WEeping FORMS

PRUNUS subhirtella. Single Weeping.

PRUNUS subhirtella. Double Weeping.

These beautiful, graceful trees are a mass of bloom in early spring. Grafted about 6 feet from the ground.

\$6.00 each

UPRIGHT FORMS

PRUNUS amanogawa. Semi-double, pale pink. Narrow, upright.

P. autumnalis. Single pink. Blossoms spring and fall.

P., Kwanzan. Double deep pink.

P., Naden. Double light pink.

P., Shirofugen. Double white.

Prices of above 5 varieties: Each	Each
4 to 5 ft.	\$4.00
5 to 6 ft.	\$5.00

P. yedoensis (*Yoshino*). Single pale pink. Extra hardy and the one which is largely planted around the tidal basin in Washington.

4 to 5 ft.	Each	\$3.00
5 to 6 ft.	Each	4.00

LARGE UPRIGHT SPECIMENS AT NURSERY

Available in some kinds as follows:	Each
7 to 8 ft., B&B	\$10.00
8 to 9 ft., B&B	15.00
9 to 10 ft., B&B	20.00

Carpinus Betula Pyramidalis

Platanus—American Plane Tree

Prunus Persica

(Flowering Peach)

PRUNUS persica (*Double Red Flowering Peach*). A small tree, covered in spring with double, showy red blossoms.

4 to 5 ft.	Each	\$1.50
5 to 6 ft.	Each	2.00

Liriodendron—Tulip Tree

ELECTRIC STEAM RADIATOR CORP., PARIS, KENTUCKY

Another example of "Industry Need Not be Ugly." We congratulate the management for making this plant a thing of beauty and a credit to the community. It should radiate warmth and hospitality alike to employes, visitors and friends. A Hillenmeyer job.

The Oaks

The Oak, with all its majesty, is the monarch of the woodlands. It is symbolical of strength, permanency and character. It has been interwoven, since time immemorial, with literature, art and craftsmanship. The family has world-wide distribution, containing many species, both evergreen and deciduous. Its timber is emblematical of strength and durability. By some it is considered of slow growth, but when given a congenial soil, develops rather rapidly in comparison with most hardwoods. When planted as specimens or street trees, varieties like Pin Oak, with their autumn coloring of yellow, orange and scarlet, are the source of enjoyment to him who plants, and elicits the admiration of the public. No lawn is complete without an Oak.

QUERCUS alba (White Oak). One of the greatest of all the Oaks. Rather difficult to transplant and of slow growth, but "patience brings a perfect reward." Leaves silver to purplish red in autumn.

Q. macrocarpa (Bur Oak). A native variety of slow growth, but becomes a stately tree well covered with thick, dark green foliage of heavy texture. For permanency it has no superior. Prefers a deep soil.

Q. nigra (Water Oak). A round-topped tree of good form. Will grow in either moist or dry soil. Foliage green until late fall.

Q. palustris (Pin Oak). The most popular of all the Oaks. Its beautiful glossy, deeply lobed green leaves change to gorgeous shades of purplish red and scarlet in the autumn. It is symmetrical, easy to transplant and of rapid growth. For street, avenue or as a lawn specimen there is nothing superior. Where a desirable hardwood tree is wanted we unhesitatingly recommend a Pin Oak.

Q. phellos (Willow Oak). A graceful tree with conical head. Long, narrow, willow-like leaves which are whitish beneath, giving a silvery appearance on a windy day. They change to yellow and orange in autumn.

Q. borealis (Rubra) (Northern Red Oak). Not as compact nor does it color as brilliantly as the Pin Oak. Somewhat more difficult to transplant but grows in almost any soil when established. One of the fine Oaks.

Prices of above varieties of Oaks:	Each
7 to 9 ft., 1 1/4 in. cal.	\$4.00
8 to 10 ft., 1 1/2 in. cal.	5.00
10 to 12 ft., 1 3/4 in. cal.	6.00
12 to 14 ft., 2 in. cal.	7.00
12 to 15 ft., 2 1/2 in. cal.	9.00

Q. robur fastigiata (Pyramidal English Oak). An upright form of English Oak which is quite valuable for specimen or formal use. Of slow growth but worth the time required for development.	Each
6 to 7 ft., B&B	\$ 7.50
7 to 8 ft., B&B	10.00
8 to 9 ft., B&B	12.00
9 to 10 ft., B&B	13.50
10 to 12 ft., B&B	15.00
12 to 15 ft., B&B	20.00

Spraying and Tree Feeding

We are now equipped to spray and feed large trees, using modern equipment and scientific methods. If your favorite tree is being destroyed by insects or is starving, you may need expert advice and treatment. Write and consult us when in need of this service.

Like other plants, trees should be fed for best results. See our Plant Foods listed on inside back cover.

Prunus - Flowering Plum

PRUNUS blieriana (Blieriana Plum). A small neat tree with rather upright branches on which are borne salmon-pink rosettes in great profusion. Very showy and desirable.

P. divaricata (Pissard's Purple Plum). A handsome, upright tree with small pale pink flowers, wine-red fruit and purple foliage.

P. divaricata (Thundercloud Purple Plum). A beautiful shapely tree with dark purple foliage about the color of the Purple Beech. Fine for contrast.

Prices of 3 above:	Each
4 to 5 ft.	\$2.00
5 to 6 ft.	3.00

Robinia - Locust

ROBINIA idahoensis (Idaho Locust). Very similar to our native Locust except it has very beautiful and striking racemes of pink and lavender blossoms in early spring. Valuable as an ornamental or shade tree.

1 1/4 in. cal.	\$4.00	2 in. cal.	\$7.00
1 1/2 in. cal.	5.00	2 1/2 in. cal.	9.00
1 3/4 in. cal.	6.00		

The Singing Leaves

But the trees all kept their council
And never a word said they,
Only there sighed from the pine tops
A music of seas far away.

—Lowell.

How to Plant a Tree

DECIDUOUS TREES—continued

Salix - Willow

SALIX babylonica (*Babylon Weeping Willow*). One of the most graceful of all the Willows. Makes a round-topped tree, and when it attains some size its long, pendulous branches are most effective.

S. blanda (*Wisconsin Weeping Willow*). Of rather upright growth when young but as it attains height and age its long, drooping silvery branches make it the most effective of all the Willows. Rapid grower in either moist or other good soil. Fine for specimens or screens. Best of the Weeping Willows.

S. niobe (*Golden Weeping Willow*). Best of the Golden Willows. Slender leaves, green above, silvery below. Twigs and bark golden.

Prices of above 3 varieties:		Each
6 to 7 ft.	\$2.00
7 to 8 ft.	2.50
8 to 9 ft.	3.00

S. caprea (*Pussy Willow*). See page 24.

Taxodium - Bald Cypress

TAXODIUM distichum. The great lumber tree of the far South, but perfectly at home here. Will grow in dry or wet soil and blends well in either deciduous or evergreen plantings. The light green foliage is needle-like, the general shape of the tree resembles a Spruce. Slow growing, but very symmetrical and as durable as an Oak; in fact, the lumber is called the "wood eternal."

		Each
6 to 8 ft., 1 1/2 in. cal.	\$5.00
7 to 9 ft., 1 3/4 in. cal.	6.00
8 to 10 ft., 2 in. cal.	7.00
10 to 12 ft., 2 1/2 in. cal.	9.00

Ulmus - Elm

ULMUS americana (*American Elm*). A vigorous native tree. It is rapid in growth, with long, spreading, and pendent branches forming giant arches over roads and streets; as a lawn tree is quick to make a marked effect. The wood is tough, the leaves are moderate in size, and make a permanent tree for shade. The beetle that defoliates the European Elms usually does not attack these.

		Each
7 to 9 ft., 1 1/4 in. cal.	\$3.50
8 to 10 ft., 1 1/2 in. cal.	4.50
10 to 12 ft., 1 3/4 in. cal.	5.50
12 to 14 ft., 2 in. cal.	6.50
12 to 15 ft., 2 1/2 in. cal.	8.00

U. americana moline (*Moline Elm*). A grafted, upright type invaluable in narrow spaces. Its clean growth, large, deep green, heavily plaited leaves, added to its sturdiness and solidity, will make it increasingly popular when it becomes known. We have a fine stock and invite your inspection.

		Each
12 to 14 ft., 2 in. cal.	\$7.00
12 to 15 ft., 2 1/2 in. cal.	9.00

U. parvifolia (*Chinese Elm*). A new, rapid growing tree that does especially well in difficult situations, like city soot and gases, dry and poor ground, narrow street plots, etc. Leaves smaller than our native Elm, habit more pendent, and of course, much more rapid. Only drawback possible is sleet damage and Elm beetle injury. Plant for twenty to thirty years' duration. We have the North China strain only and it will make up as quickly as a Willow.

		Each
7 to 9 ft., 1 1/4 in. cal.	\$3.00
8 to 10 ft., 1 1/2 in. cal.	3.50

Fraxinus—Ash

Tilia - Linden

TILIA americana (*American Linden*). Sometimes known as Basswood. This native tree is very attractive and will grow rapidly when planted in low ground. The leaves are distinctly larger than other varieties. Branches pendulous. Makes an excellent shade tree under favorable conditions.

		Each
7 to 9 ft., 1 1/4 in. cal.	\$3.50
8 to 10 ft., 1 1/2 in. cal.	4.50
10 to 12 ft., 1 3/4 in. cal.	5.50
12 to 14 ft., 2 in. cal.	6.50
12 to 15 ft., 2 1/2 in. cal.	8.00

T. platyphyllos pyramidalis (*Pyramidal Bigleaf Linden*). A compact, upright form which can be used effectively in a very narrow space. Also desirable as a screen or sentinel tree.

		Each
7 to 8 ft.	\$5.00
8 to 9 ft.	6.00
9 to 10 ft.	7.50
10 to 12 ft.	9.00

T. europaea (*European Linden*). Similar to the American Linden except the leaves are smaller and the tree is more compact, developing to a shapely specimen.

7 to 9 ft., 1 1/2 in. cal.	\$5.00
9 to 10 ft., 1 3/4 in. cal.	6.00
10 to 11 ft., 2 in. cal.	7.00
11 to 12 ft., 2 1/2 in. cal.	9.00

"Poems are made by fools like me
 But only God can make a tree."
 —Joyce Kilmer.

Ulmus Parvifolia—Chinese Elm

Quercus Palustris—Pin Oak

Peonies

The Flowers For Everybody

There are few flowers which have been improved more than the Peony. From the old-fashioned reds and pinks, familiar in our grandmothers' gardens, we now have marvelous varieties with better color, form, and all-around quality.

Peonies are often rated on the basis of 10 as perfect but we are frank to state that we do not always concur. We have tested hundreds of varieties so as to give our customers the best and find that some of the highest rated kinds just do not perform satisfactorily here in the South. The kinds offered can be planted with confidence.

They are at home and should be in every garden. Plant the crowns about 2 or 3 inches deep, use bone meal, see that they get sufficient water at blooming time and you will be more than pleased if you use HILLENMEYER'S CHOICE ROOTS.

STRONG DIVISIONS—YOUR ASSORTMENT
60c each; 10 for \$5.00.

For Parcel Post and Insurance, add 10 per cent.

SINGLE PEONIES

This type is distinguished by its five or more large petals surrounding a center of yellow stamens. Most are early and they stand wind and rain well. Very conspicuous.

Clairette. Large white flowers of unusual beauty; prominent tuft of golden stamens.

Duchess of Portland. Delicate shade of flesh-pink; large.

L'Étincelante. Rose-pink, margined silver. One of the best.

The Moor. Very attractive deep rich red of unusual beauty; stamens yellow and striking.

JAPANESE PEONIES

In these we have five or more guard petals surrounding a center of showy and abortive anthers. The second stage of development into the double type.

Akai. Guards deep American Beauty shade; petaloids conspicuous saffron-yellow, margined rose.

Ruigegno. Dark maroon, with petaloids of most pleasing yellow. Very showy.

Snow Wheel. Large, pure white petals and petaloids. Our best white Japanese variety.

DOUBLE PEONIES

RED

Bunker Hill. Beautiful bright red with long, stiff stems. Has done exceedingly well with us.

Felix Crousse. Midseason. The most pleasing velvety red, fading to lighter shades as the blossom fades.

Karl Rosenfield. Late midseason. Large, showy, rich velvety crimson. Color striking.

Longfellow. A distinctive, fadeless crimson. Good foliage with strong stiff stems. Early midseason. Dependable.

Mary Brand. Vivid crimson with silvery sheen which gives it added brilliance. Midseason.

WHITE

Baroness Schroeder. Midseason. Delicate flesh-pink; fading to white with suggestion of heliotrope and gold.

Festiva Maxima. Early. The grandest white Peony. The extra large flowers are pure white, except petals tipped carmine.

Marie Jacquin. "Water-Lily Peony." Semi-double; favorite with everyone.

Mme. de Verneville. Early. Desirable, free-blooming, should be in every collection.

PINK

Edulis Superba. Early. Deep rose. Valued for its fragrance and freedom of bloom.

Georgiana Shaylor. Most exquisite shade of soft rose-pink. Midseason. Fragrant.

Lady Alexandra Duff. An unusual delicate flesh-pink. One of the most striking of all Peonies, with extra large, cup-shaped flowers.

Martha Bulloch. Silvery shell-pink at center, deepening to deep rose-pink. Late.

Mons. Jules Elie. Early to midseason. Large, compact; lilac-rose with lighter pink base petals; fragrant. Extra fine.

Reine Hortense. Midseason. Large, flat; flesh to shell-pink; very fragrant. One of the finest.

Samuel Hughes. Late. Fine upright variety with unusual style and color combination — silver-pink. Excellent variety.

Sarah Bernhardt. Late. Very large flowers of apple-blossom-pink, with silver-tipped petals. Vigorous.

Solange. Late. Large, compact. Outer petals delicate, waxy white, deepening toward the center with shades of golden brown. Free bloomer.

Venus. Midseason. Pale hydrangea-pink. Large.

L'Étincelante

Mary Brand

ROSES

We are not listing Roses in this catalog. However, a choice list will be found in our Spring Folder, which will be sent you soon after the first of the year. If you do not receive your copy, write or phone for it.

Flowering and Ornamental Shrubs

"The beautiful lessons which 'blossoms' teach to children."—Chaplin

THERE is a place for flowering shrubs around every home—cottage, mansion or palace. A corner needs a little color, a foundation wall needs to be concealed, a garage should be screened. In all these places flowering shrubs are adaptable and useful.

From our fields this year we shall take the finest shrubs possible to grow—large, well developed, with good roots, and not by any means like the shrubs sold on "bargain" counters, which in many cases are of unknown origin. In fact, Hillenmeyer shrubs carry several canes, and only the small sizes can be sent by parcel post.

The size shown after each shrub indicates the approximate height it should be expected to attain.

Abelia Grandiflora

See page 7.

Acanthopanax

ACANTHOPANAX sieboldianus (*Five-leaved Aralia*). 4 to 6 ft. An interesting and very satisfactory shrub for planting in a shady place or under city conditions. Branches upright, prickly, arching and bearing bright green leaves in fives. If you have a troublesome situation, poor soil, shade or other adverse conditions give this shrub a trial.

2 to 3 ft.	Each \$0.60	4 to 5 ft.	Each \$1.00
3 to 4 ft.75		

Aronia—Chokeberry

Aesculus

AESCULUS pavia (*Red Buckeye*). 6 to 10 ft. A southern shrub, recommended for naturalistic plantings. Its bright red spikelike flowers are produced in May, followed by distinctive fruit. Leaves compound, 4 to 5 inches long. Foliage not always the best but well worth planting because of its striking effect when in bloom.

4 to 5 ft.	Each \$1.50
5 to 6 ft.	2.00

Buddleia

6 to 7 ft.	Each \$2.50
-----------------	-------------

Aralia

ARALIA spinosa (*Devil's Walkingstick*). 10 to 15 ft. A large, vigorous shrub or small tree giving semi-tropical effect. The stiff, erect, very prickly stems bear compound leaves which may be two feet or more in length. The leaflets are small, giving a feathery effect to the whole plant. Small white flowers in July or August. A very effective shrub when properly used.

3 to 4 ft.	Each \$1.00	5 to 6 ft.	Each \$1.50
4 to 5 ft.	1.25		

Aronia - Chokeberry

ARONIA arbutifolia brilliantissima (*Brilliant Chokeberry*). 3 to 5 ft. A useful shrub combining good habits of growth, attractive summer and fall foliage, showy flowers and brilliant fruits. The medium size leaves are glossy green, turning bright red in the fall. The white flowers in early May are followed by fruit which becomes brilliant red in the fall and is very persistent. One of our best berry-bearing shrubs. Will grow in sun or partial shade but requires ample moisture.

18 to 24 in.	Each \$0.60	3 to 4 ft.	Each \$1.00
2 to 3 ft.75		

BENZOIN aestivale. See Linder.

Berberis - Barberry

BERBERIS thunbergi (*Japanese Barberry*). 3 to 4 ft. Low, compact shrub with horizontal or arched branches. Twigs thorny, making it ideal for an almost impenetrable hedge when mature. If left unpruned it will develop into a graceful, mound-like plant. The small green leaves come out early in the spring, along with the small yellow flowers. The foliage takes on a brilliant orange-scarlet when in the open and the flowers are followed by brilliant red fruit which persists throughout the winter. Will grow in almost any location but should be watered in periods of extreme drought.

15 to 18 in.	Each \$0.50	2 to 2 1/2 ft.	Each \$0.75
18 to 24 in.60	2 1/2 to 3 ft.	1.00

B. thunbergi atropurpurea (*Red Leaf Barberry*). 3 to 4 ft. Resembles the Japanese Barberry in growth, but the foliage is brilliant blood-red in spring. The color holds all summer in sun, but in shady places it becomes a beautiful bronzy green. Its winter charm is enhanced by red berries that remain until spring. Few shrubs attract so much attention, or add so much color to a dull border. We consider it one of the best plants, and our stock is strong and vigorous.

18 to 24 in.	Each \$0.75	2 1/2 to 3 ft.	Each \$1.25
2 to 2 1/2 ft.	1.00		

This "House of God," Seating 3000, Has Been Made More Attractive by a Few Well Chosen Trees and Evergreens

Chaenomeles—Flowering Quince

C. japonica (Maulei) (Japanese Flowering Quince). A little known but outstanding species of medium growth. Good foliage and orange flowers. Very attractive.
 Each \$0.75
 2 to 3 ft. \$0.75 3 to 4 ft. \$1.00

Chionanthus - White Fringe

CHIONANTHUS virginiana. 12 to 15 ft. As a large shrub or small tree, for use in border planting or specimen, few plants surpass the White Fringe. Its large, somewhat glossy leaves are attractive throughout the summer and add a pleasing bright yellow to the array of autumn colors. Large clusters of drooping white flowers hang from the ends of the twigs in late spring. Dark blue fruit in August. Prefers a moist acid soil. Worthy of a place on any lawn.
 Each \$0.75
 2 to 3 ft. \$0.75 4 to 5 ft. \$1.50
 3 to 4 ft. 1.00

Cornus - Dogwood

CORNUS florida (White Flowering Dogwood). See page 11.
C. florida rubra (Pink Flowering Dogwood) See page 11.
C. alba sibirica (Siberian Dogwood). 6 to 8 feet. Greenish white flowers in June. Grown because of its conspicuous red winter twigs. Cutting out old wood increases brilliance of new growth.
 Each \$0.60
 2 to 3 ft. \$0.60 3 to 4 ft. \$0.75
C. mas (Corneliancherry Dogwood). 10 to 15 ft. Attractive large shrub or small tree. Its small yellow blossoms are hardy and appear a few days ahead of the Forsythia. They are followed by large brilliant cherry-like fruit, ripening in midsummer. Does well in almost any soil. Valuable for its early spring effect.
 Each \$0.75
 3 to 4 ft. \$0.75 4 to 5 ft. \$1.00

Cotoneaster

COTONEASTER acutifolia (Peking Cotoneaster). 5 to 6 ft. Slender, upright or slightly spreading branches, bearing small, pointed, glossy green leaves which take on a reddish purple hue in the fall. Small pink flowers in May followed by shiny black fruit which persists until fall. Prefers good, well-drained soil. Excellent for a compact screen or hedge.
 Each \$0.60
 2 to 3 ft. \$0.60 4 to 5 ft. \$1.00
 3 to 4 ft. .75
C. divaricata (Spreading Cotoneaster). 4 to 5 ft. A semi-evergreen variety with good foliage and scarlet fruit.
 Each \$1.50
 2 to 3 ft., B&B \$1.50 4 to 5 ft., B&B \$3.00
 3 to 4 ft., B&B 2.00

Deutzia

DEUTZIA gracilis (Slender Deutzia). 2 to 3 ft. A graceful, dwarf shrub which covers its arching branches with small racemes of white flowers in early spring. Does well in sun or shade.
 Each \$0.75
 15 to 18 in. \$0.75 18 to 24 in. \$1.00
D. lemoinei (Lemoine Deutzia). 3 to 4 ft. An upright shrub that is exceedingly free blooming in April and May, with stems completely covered with white blossoms. Stems droop as they age.
 Each \$0.75
 18 to 24 in. \$0.75 2 to 3 ft. \$1.00
D. magnifica (Showy Deutzia). 6 to 8 ft. A Japanese upright form producing in June a profusion of double white flowers in racemes. Suggests a double form of Lily-of-the-Valley. Useful for quick effect and screens.
 Each \$0.60
 2 to 3 ft. \$0.60 4 to 5 ft. \$1.00
 3 to 4 ft. .75 5 to 6 ft. 1.25
D. scabra, Pride of Rochester. 6 to 8 ft. Covered in June with pinkish white, showy flowers. Hardy, upright, distinct in form, adaptable to all locations and soils.
 Each \$0.60
 2 to 3 ft. \$0.60 4 to 5 ft. \$1.00
 3 to 4 ft. .75 5 to 6 ft. 1.25

Buddleia - Butterfly Bush

There should be a place for these continuous summer-blooming shrubs around every home. Their long, pointed spikes of various shades resemble a Lilac though they are in no way related. Easy of culture. Often freeze to the ground unless protected, but will come back year after year.

BUDDLEIA, Charming. Soft pink; very desirable.
B. magnifica. Violet. Best of the older varieties.
B. Ile de France. Rosy violet-purple. Vigorous and floriferous.

Prices of above 3: Each \$0.60
 18 to 24 in. \$0.60
 2 to 3 ft. .75

Callicarpa

CALLICARPA dichotoma (Purpurea) (Purple Beautyberry). 3 to 4 ft. One of our very few shrubs with attractive violet-blue fruit in the fall. Slightly slender, upright, spreading, with attractive medium green foliage. Flat clusters of pinkish flowers in late summer. As the branches are not always hardy, it is best to use in a situation where they may be cut to the ground each spring. Desirable as a background to the perennial border.
 Each \$0.60
 18 to 24 in. \$0.60 2 to 3 ft. \$0.75

Calycanthus

CALYCANTHUS floridus (Sweet Shrub). 6 to 8 ft. Few shrubs have persisted as well as the Calycanthus. Always found in "Grandma's" garden. Its sweet, aromatic reddish brown flowers are most appreciated. The blossoms are produced in late spring followed by large pods, filled with smooth brown seed. Use as a specimen or for planting in a large border.
 Each \$0.60
 2 to 3 ft. \$0.60 4 to 5 ft. \$1.00
 3 to 4 ft. .75

Chaenomeles - Flowering Quince

CHAENOMELES lagenaria (Cydonia japonica) (Common Flowering Quince). 5 to 8 ft. One of our best early blooming shrubs. Upright, spreading, with attractive foliage. The bell-shaped blossoms are usually from a light pink to scarlet. They open before the leaves appear and are borne all along the branches. Has good glossy foliage. Grows in most any location and can be used as a hedge, screen or specimen.

Each \$0.75
 2 to 3 ft. \$0.75 3 to 4 ft. \$1.00
C. lagenaria alba. 4 to 5 ft. A white form of the Common Flowering Quince with all its good qualities. Does not grow quite so large.
 Each \$0.75
 18 to 24 in. \$0.75 2 to 3 ft. \$1.00
C. lagenaria pygmaea (Dwarf Flowering Quince). 3 ft. A dwarf form of Cydonia with fresh-pink flowers which are most attractive. A fine variety where a low type is desired.
 Each \$0.60
 15 to 18 in. \$0.60
 18 to 24 in. .75

Calycanthus

Deutzia Lemoinei

Euonymus Alatus Compactus

Euonymus Patens

Flowering Shrubs—continued
Elaeagnus - Russian Olive

ELAEGNUS angustifolia (*Russian Olive*). 15 ft. An unusual shrub with dark green bark and silvery foliage. Fragrant, deep golden yellow flowers followed by ornamental olive fruit. Valuable for contrast with green foliage plants.

	Each	Each
3 to 4 ft.	\$0.75	5 to 6 ft. \$1.25
4 to 5 ft.	1.00	

Euonymus

EUONYMUS alatus (*Winged Euonymus*). 8 to 10 feet. A distinct shrub with good green foliage which colors to brilliant rose in fall. Produces small red berries, and is attractive in winter by reason of its curious corky bark, along the rather stiff spreading branches. Adaptable to shade or sun; an admirable shrub.

	Each	Each
2 to 3 ft.	\$1.00	4 to 5 ft. \$1.50
3 to 4 ft.	1.25	

E. alatus compactus (*Dwarf Winged Euonymus*). 5 to 6 ft. Similar to the preceding except that it is more compact, does not grow so large and colors more brilliantly in the fall. An outstanding shrub.

	Each	Each
2 to 2½ ft.	\$1.50	3 to 3½ ft. \$2.00
2½ to 3 ft.	1.75	3½ to 4 ft. 2.50

E. americanus (*Brook Euonymus*). 7 to 8 ft. Has attractive pink fruit in the fall, somewhat resembling a Strawberry. Foliage colors well in autumn. While it grows under ordinary conditions its native habitat is moist locations.

	Each	Each
2 to 3 ft.	\$0.75	4 to 5 ft. \$1.25
3 to 4 ft.	1.00	

E. europaeus (*European Euonymus*). 10 to 15 ft. A tall, slender shrub with green bark and deep green foliage that colors in autumn. Prized for the wealth of coral fruit in fall.

	Each	Each
3 to 4 ft.	\$0.75	5 to 6 ft. \$1.50
4 to 5 ft.	1.00	

E. patens kiautschovicus (*Evergreen Wahoo*). See page 7.

E. yedoensis (*Yeddo Euonymus*). 6 to 8 ft. A showy Asiatic shrub with small yellow flowers in early spring followed in fall by scarlet fruit surrounded by pink husks. The foliage becomes a brilliant red in autumn.

	Each	Each
2 to 3 ft.	\$0.75	4 to 5 ft. \$1.25
3 to 4 ft.	1.00	

Exochorda - Pearl Bush

EXOCHORDA racemosa (*Pearl Bush*). 8 to 10 ft. One of the most pleasing spring flowering shrubs, producing a mass of white blossoms in April. Should be used extensively in mass plantings. Prune severely at planting time for best results.

	Each	Each
2 to 3 ft.	\$0.60	4 to 5 ft. \$1.00
3 to 4 ft.75	5 to 6 ft. 1.25

Forsythia - Golden Bell

The harbingers of spring, with their joyous, clear yellow bells borne in profusion. No shrub gives a richer display of pure yellow than do the Forsythia. Beautiful as specimen, in masses or as hedge plants.

FORSYTHIA spectabilis (*Showy Forsythia*). 5 to 8 ft. Because of its showy flowers, which are borne in great profusion, it is the most popular.

F. suspensa (*Weeping Forsythia*). 4 to 6 ft. A weeping form used to cover walls or as a low spreading specimen.

Price of above Forsythias:

	Each	Each
2 to 3 ft.	\$0.60	4 to 5 ft. \$1.00
3 to 4 ft.75	5 to 6 ft. 1.50

F. suspensa nana. 3 to 4 ft. A dwarf, more compact form with the usual size yellow blossoms. Quite useful where a large Forsythia cannot be used.

	Each	Each
18 to 24 in.	\$0.60	2 to 3 ft. \$0.75

Halesia - Silver Bell

HALESIA caroliniana (*Carolina Silver Bell*). 15 to 18 ft. A large shrub or small tree which blooms with the Dogwood. Its mass of snow-white, bell-shaped flowers are most attractive, followed by fruit which has 4 papery wings.

	Each	Each
3 to 4 ft.	\$0.75	5 to 6 ft. \$1.25
4 to 5 ft.	1.00	

Hamamelis - Witchhazel

HAMAMELIS vernalis (*Vernal Witchhazel*). 6 to 8 ft. A medium shrub with many branches which are usually covered with one-half inch yellow blossoms in January or February. Prefers a moist location. Good for naturalizing.

	Each	Each
2 to 3 ft.	\$0.60	4 to 5 ft. \$1.00
3 to 4 ft.75	

H. virginiana (*Common Witchhazel*). 8 to 10 ft. Ribbon-like, yellow flowers in late autumn. Good for natural planting and shady places.

	Each	Each
3 to 4 ft.	\$0.75	5 to 6 ft. \$1.25
4 to 5 ft.	1.00	

Hibiscus - The Altheas

HIBISCUS syriacus (*Shrub Althea*). 5 to 7 ft. Bloom from June to frost. Upright in growth and rarely spreads over 3 feet. It does astonishingly well in cities or congested areas where other plants fail.

- H., *Ardens*. Double; lavender.
- H., *Boule de Feu*. Double; red.
- H., *Coelestis*. Single; blue.
- H., *Jeanne d'Arc*. Double; white.
- H., *Single Pink*. Clear pink.
- H., *totus albus*. Single; white.

All Hibiscus:

	Each
2 to 3 ft.	\$0.60
3 to 4 ft.75
4 to 5 ft.	1.00

Forsythia Spectabilis

Hydrangea

Grand, free-flowering shrubs with large clusters or panicles of showy white flowers. They are admirably adapted for border or foundation planting, either as specimens or in masses. Like a fertile, moist soil with full or partial exposure.

- HYDRANGEA arborescens grandiflora** (*Snowhill Hydrangea*). 3 to 4 ft. A continuous bloomer with flower resembling a Snowball. Much used in foundation plantings.

18 to 24 in. Each \$0.75	2 to 3 ft. Each \$1.00
-------------------------------	-----------------------------
- H. paniculata grandiflora** (*Panicle Hydrangea*). 4 to 5 ft. The old standard variety with large blossoms in August which turn pinkish under favorable weather conditions.

18 to 24 in. Each \$0.75	2 to 3 ft. Each \$1.00
-------------------------------	-----------------------------
- H. quercifolia** (*Oak-Leaf Hydrangea*). 4 to 5 ft. A distinct and handsome variety with short, stiff, spreading branches. Leaves deeply lobed, dark green above, silvery and downy beneath, which somewhat resemble an Oak. A very fine, useful shrub.

18 to 24 in. Each \$1.00	3 to 4 ft. Each \$2.00
2 to 3 ft. 1.50	

Ilex - Winterberry

ILEX verticillata (*Common Winterberry*). 4 to 5 ft. A deciduous Holly much admired for its brilliant scarlet berries which remain on the plant most of the winter. A spreading shrub which prefers a rather moist location and some shade. Staminate and pistillate plants should be set together for pollination.

- | | |
|-----------------------------|-----------------------------|
| 2 to 3 ft. Each \$0.75 | 3 to 4 ft. Each \$1.00 |
|-----------------------------|-----------------------------|

Kerria - Globe Flower

Attractive shrub, native of Japan, with slender green branches and showy yellow flowers. Will grow in any well-drained soil.

KERRIA japonica. Single.

- K. japonica flore-pleno**. Double.

Above Kerria: Each \$0.75	3 to 4 ft. Each \$1.25
18 to 24 in. 1.00	
2 to 3 ft. 1.00	

Kolkwitzia - Beauty Bush

KOLKWITZIA amabilis (*Beauty Bush*). 6 to 10 feet. One of the most desirable introductions from Asia. Strong canes develop into graceful, sweeping branches. The flowers are shell to deep pink, with yellow markings, and produced in great profusion all over the plant. Might be called a much refined Weigela. Greatly admired.

- | | |
|-----------------------------|-----------------------------|
| 2 to 3 ft. Each \$0.75 | 4 to 5 ft. Each \$1.50 |
| 3 to 4 ft. 1.00 | |

Lespedeza

LESPEDEZA thunbergi (*Thunberg Lespedeza*). An attractive, August-blooming, herbaceous shrub, with reddish purple, sweet scented, pealike flowers borne on arching branches, and lasting several weeks. Very graceful; makes a good "forward" plant for the shrub border. The tops may freeze in a severe winter, but come back each spring.

- | | |
|--|---|
| Medium plants, 2 to 3 ft. Each \$0.75 | Large plants, 3 to 4 ft. Each \$1.00 |
|--|---|

Ligustrum - Privet

For Hedge Plants, see page 25.

LIGUSTRUM sinense (*Chinese Privet*). 6 to 10 ft. A small-leaved, almost evergreen Privet, much used for hedges, also very desirable for landscape work because of its rapid growth, good foliage, and graceful branching. Is not particular about soil, and for screening and mass planting is unexcelled. Sometimes freezes during low temperature but comes back satisfactorily.

- | | |
|------------------------------------|------------------------------------|
| 2 to 3 ft. shrubs Each \$0.50 | 4 to 5 ft. shrubs Each \$0.75 |
| 3 to 4 ft. shrubs60 | |

L. obtusifolium regelianum (*Regel Border Privet*). 6 to 7 ft. Low, spreading, and very twiggy, with dense foliage. Because of its graceful appearance, hardness, and adaptability to any soil and shady places, it is the most widely used Privet for landscape work.

- | | |
|-----------------------------|-----------------------------|
| 2 to 3 ft. Each \$0.60 | 4 to 5 ft. Each \$1.00 |
| 3 to 4 ft.75 | |

Lindera - Spicebush

LINDERA benzoin (*Common Spicebush*). 6 to 8 ft. Does remarkably well in moist, shady locations. Alternate, light green leaves turning pale yellow in the autumn. Small yellow flowers are produced in early spring before the leaves appear, followed by red fruit in late summer. Birds are especially fond of the fruit. Leaves and twigs are aromatic when crushed.

- | | |
|-----------------------------|-----------------------------|
| 2 to 3 ft. Each \$1.00 | 4 to 5 ft. Each \$1.50 |
| 3 to 4 ft. 1.25 | |

Lonicera - Honeysuckle

LONICERA fragrantissima (*Winter Honeysuckle*). 8 to 10 ft. So called because of its very fragrant, white blossoms in early spring. The foliage is deep green and glossy. Grows well in partial shade, poor soil, or cities where tender plants fail. Almost evergreen. Excellent for screens, specimens, or hedges. One of our best and most useful shrubs. For Hedges, see page 25.

L. maackii podocarpa (*Late Honeysuckle*). 8 to 10 ft. A large, handsome shrub with pinkish blossoms followed by quantities of bright red berries which attract birds. Much prized for screen and mass planting.

L. tatarica (*Tartarian Honeysuckle*). 6 to 8 ft. Blooms in April, and is one of the few early pink-flowering shrubs. Has bright red berries that stay on all summer or until taken by birds.

- | | |
|----------------------------|-----------------------------|
| All Loniceras: Each \$0.60 | 4 to 5 ft. Each \$1.00 |
| 2 to 3 ft.75 | |
| 3 to 4 ft.75 | |

Lonicera Tatarica—Honeysuckle

Kerria—Globe Flower

Hydrangea Paniculata Grandiflora

Philadelphus, Virginal

MR. AND MRS. GEORGE SWINEBROAD
137 Tahoma Road, Lexington, Kentucky

This pool and its beautiful background were completed within a few months, giving joy and pleasure to this nationally known auctioneer and his wife.

Kolkwitzia—Beauty Bush

Magnolia

MAGNOLIA virginiana (*Sweet Bay Magnolia*). A fine, large American shrub with glossy, laurel-like, almost evergreen foliage. The richly fragrant white flowers come in June and are followed by attractive fruits.

3 to 4 ft., BGB	Each	\$5.00
4 to 5 ft., BGB	Each	6.00
5 to 6 ft., BGB	Each	7.50

M. kobus (*Kobus Magnolia*). A desirable upright shrub or small tree with short and slender branches. Pure white flowers 4 to 5 inches across appearing before the leaves.

5 to 6 ft.	Each	\$ 7.50
6 to 7 ft.	Each	10.00

M. macrophylla. See page 12.

M. tripetala. See page 12.

MAHONIA aquifolium. See page 8.

M. liliflora nigra (*Purple Magnolia*). Has larger flowers than the type which are dark purple outside and light pink to purple inside. One of the hardiest and best.

M. soulangeana (*Saucer Magnolia*). All of the Soulangeana type have large Tulip-shaped blossoms which expand early in the spring before the leaves. Very ornamental, and a garden treasure. The true Soulangeana is pink on the outside with white inside. The best known and most popular.

M. soulangeana lennei (*Lenne's Magnolia*). Outside rosy or reddish purple. White within. Later than the type.

The above 3 kinds:		Each	
2 to 3 ft., BGB	Each	\$4.00
3 to 4 ft., BGB	Each	6.00
4 to 5 ft., BGB	Each	8.00

M. stellata (*Star Magnolia*). Native of the Orient. Shrubby habit with fragrant, semi-double, starlike flowers which appear before the leaves. One of the best.

2 to 3 ft., BGB	Each	\$5.00
3 to 4 ft., BGB	Each	7.50

Oxydendrum - Sourwood

OXYDENDRUM arboreum. 10 to 12 ft. The Lily-of-the-Valley-like flowers are borne in panicles in July and August. Its foliage is particularly brilliant in fall.

3 to 4 ft.	Each	\$1.25
4 to 5 ft.	Each	1.50
5 to 6 ft.	Each	2.00
6 to 7 ft.	Each	
7 to 8 ft.	Each	4.00

Philadelphus - Mock Orange

PHILADELPHUS grandiflorus (*Big Scentsless Mock Orange*). 6 to 8 ft. Its white blossoms in June are larger than most, and very attractive. Where a tall plant is wanted, few are better than this. Succeeds under all soil conditions.

2 to 3 ft.	Each	\$0.75
3 to 4 ft.	Each	1.00
4 to 5 ft.	Each	1.25
5 to 6 ft.	Each	1.50

P. lemoinei (*Lemoine's Mock Orange*). 4 to 5 ft. Of good, compact, upright habit, leaves smaller than most and blossoms sweetly scented.

2 to 3 ft.	Each	\$1.00
3 to 4 ft.	Each	1.25

P., Virginal (*Virginal Mock Orange*). 6 to 7 ft. The finest of all the Mock Oranges. While it produces flowers intermittently throughout the growing season, its great value lies in its magnificent spring display. The pure white, fragrant flowers are large, often 2 inches across, semi-double, and borne in such profusion that the branches are weighted down. The plant is an erect and moderate grower. No one should be without this delightful shrub—the best of the Mock Oranges.

2 to 3 ft.	Each	\$0.75
3 to 4 ft.	Each	1.00
4 to 5 ft.	Each	1.25
5 to 6 ft.	Each	1.50

Photinia

PHOTINIA villosa (*Oriental Photinia*). 10 to 12 ft. An unusual shrub, not often available. It has deep green, glossy foliage and is of dense, branching habit. The foliage colors brilliantly in the fall, and the small flowers, produced in June, are followed by attractive red berries that hang on until taken by birds.

3 to 4 ft.	Each	\$1.00
4 to 5 ft.	Each	1.50
5 to 6 ft.	Each	\$2.00

Prunus - Flowering Almond

PRUNUS glandulosa (*Almond Cherry*). 3 to 4 ft. Rose-pink. The attractive plants are thickly studded in April with medium sized, double pink flowers from base to tip of branch.

18 to 24 in.	Each	\$0.60
		Each	2 to 3 ft. \$0.75
		Each	3 to 4 ft. 1.00

Rhodotypos

RHODOTYPOS scandens (*Black Jetbead*). 4 to 5 ft. Ornamental shrub with bright green, serrated leaves and large white flowers one-half to one inch across in May and June. These are followed by shining black fruits that adhere practically all winter. A desirable shrub.

2 to 3 ft.	Each	\$0.60
3 to 4 ft.	Each	\$0.75
4 to 5 ft.	Each	1.00

Rhus - Sumac

RHUS aromatica (canadensis). (*Fragrant Sumac*). 4 to 5 ft. Yellow flowers in clusters, followed in summer with coral-red fruits. Pleasant, aromatic foliage. Fine as an undershrub or in dry, shady, rocky places.

2 to 3 ft.	Each	\$0.60
3 to 4 ft.	Each	.75
4 to 5 ft.	Each	\$1.00

R. copallina (*Flameleaf Sumac*). 7 to 10 ft. The native variety that colors so wonderfully in the fall. It is not as robust a grower as some of the others, but is most desirable.

2 to 3 ft.	Each	\$0.60
3 to 4 ft.	Each	.75
4 to 5 ft.	Each	\$1.00
5 to 6 ft.	Each	1.25

The size shown after each shrub indicates the approximate height it should be expected to attain.

Robinia - Locust

ROBINIA hispida (*Rose-Acacia; Locust*). 6 to 8 ft. Foliage resembles that of our native Locust. Long, graceful, deep rose-pink flowers in May make it most attractive.

2 to 3 ft.	Each	4 to 5 ft.	Each
3 to 4 ft.	\$0.60		\$1.00
	.75		

Spiraea - Spirea

SPIRAEA arguta (*Garland Spirea*). 4 to 5 ft. Very free flowering in April. Its small, soft green foliage gives a billowy appearance and makes it one of the most attractive plants. Very much like *S. thunbergii*, but grows slightly larger.

18 to 24 in.	Each
2 to 3 ft.	\$0.60
3 to 4 ft.75
	1.00

S. bumalda (*Bumalda Spirea*). 2 to 3 ft. A beautiful free flowering shrub with upright branches and usually with bright green leaves. However, there may be an occasional variegation of yellow foliage. The flowers are deep pink, produced in large flat-topped clusters throughout most of the summer.

18 to 24 in.	Each
2 to 3 ft.	\$0.60
	.75

S. bumalda, Anthony Waterer. 18 to 24 in. A compact, low-growing shrub with dense foliage, usually deep green with occasional variegated leaves of pink and white on young growth. The bright pink flowers are borne in full, flat clusters on erect stems in June and July. If these are cut away when they fade, the shrub will bloom during the summer. Valuable for edging in front of shrubbery and sometimes used as a dwarf hedge.

15 to 18 in.	Each
18 to 24 in.	\$0.75
	1.00

S. cantoniensis (*Reeves' Double Spirea*). 4 to 5 ft. The double white flowers are borne in clusters along the branches in May and the shrub resembles *Spiraea Van Houttei*, except the flowers are double and the leaves are longer and narrow. Foliage persistent in the fall.

18 to 24 in.	Each
2 to 3 ft.	\$0.75
	1.00

S. douglasi (*Douglas Spirea*). 5 to 6 ft. Terminals of each branch crowned with deep pink flower spikes 6 inches long in July. Our plants are an improved type known as *Spiraea richmensis*.

2 to 3 ft.	Each
3 to 4 ft.	\$0.60
4 to 5 ft.75
	1.00

S. prunifolia (*Bridal Wreath Spirea*). 5 to 6 ft. An old-fashioned variety with white, double flowers borne close to the slender, erect branches in March and April before the foliage appears.

2 to 3 ft.	Each
3 to 4 ft.	\$0.60
4 to 5 ft.75
	1.00

S. thunbergii (*Thunberg Spirea*). 2½ to 3½ ft. A graceful shrub with slender, arching branches and small, narrow, light green leaves which change to shades of orange in fall. White, minute flowers appearing in great profusion in early spring. Fine for low foundation planting.

18 to 24 in.	Each
2 to 3 ft.	\$0.75
	1.00

S. trichocarpa (*Korean Spirea*). 4 to 6 ft. A rather new *Spiraea* which resembles the well known *S. Van Houttei*, except later, more vigorous and with larger leaves and flowers. The white blossoms are borne on recurved branches.

2 to 3 ft.	Each
3 to 4 ft.	\$0.75
4 to 5 ft.	1.00
	1.25

S. Van Houttei (*Van Houtte Spirea*). 4 to 5 ft. This shrub should need no description as it is planted and known all over America. The rather slender, arching branches are literally covered with clusters of small white flowers in early spring. Good foliage and form, but should be planted where it does not have to be cut back too severely. Can be used as specimen, in masses, or for a graceful hedge. Have a wonderful stock of plants. For hedges or quantity lots ask for prices.

2 to 3 ft.	Each
3 to 4 ft.	\$0.60
4 to 5 ft.75
	1.00

Spiraea Van Houttei

Symphoricarpos—Coralberry

Syringa - Lilac

SYRINGA josikaea (*Hungarian Lilac*). 8 to 10 ft. It produces large trusses of violet flowers later than ordinary Lilacs; the round, heavy foliage is not subject to mildew.

S. oblata dilatata (*Korean Early Lilac*). 8 to 10 ft. A Chinese variety with good foliage. Single pinkish blue blossoms borne in rather loose clusters. Very early and desirable.

S. villosa (*Late Lilac*). 6 to 8 ft. Latest to bloom. Pale pinkish lilac flowers, very fragrant. Plants bushy and compact.

Above 3 varieties:	Each		Each
3 to 4 ft.	\$1.25	5 to 6 ft.	\$2.00
4 to 5 ft.	1.50		

S. persica (*Persian Lilac*). 6 to 8 ft. Rich lilac color; blooms later than old-fashioned kinds.

S. vulgaris (*Common Purple Lilac*). 6 to 8 ft. The old familiar Purple Lilac of grandmother's garden, and which has lost none of its charm. Entirely hardy; blooms in April.

S. vulgaris alba (*Common White Lilac*). 6 to 8 ft. This is the old-fashioned White Lilac. Blooms in April.

Above 3 varieties:	Each		Each
2 to 3 ft.	\$0.75	4 to 5 ft.	\$1.25
3 to 4 ft.	1.00		

Syringa - French Lilacs

The so-called French Lilacs have been derived by crossing the best of the species, especially *Syringa vulgaris*. There are many wonderful varieties and after much testing we have selected the following as the best for our section.

- ***Adelaide Dunbar**. Semi-double maroon to violet-red.
- ***Alphonse Lavallee**. Double, light purple.
- ***Buffon**. Single, mauve-pink.
- ***Charles Tenth**. Single, reddish violet.
- ***Congo**. Single, reddish purple.
- ***De Mirabel**. Single, dark, bluish violet. Slow growing and rather dwarf.
- ***Descartes**. Single, clear pink.
- ***Ellen Willmott**. Double, creamy white.
- ***Katherine Havemeyer**. Very double, beautiful mauve-pink.
- ***Ludwig Spaeth**. Single, large, deep rich purple-red.
- ***Michel Buchner**. Double, pinkish lilac.
- ***Mme. Casimir Perier**. Double, pure white.
- ***Mme. F. Morel**. Large, single, reddish purple.
- ***President Fallieres**. Double, bright clear pink.
- ***President Grevy**. Double, delicate blue.
- ***Vauban**. Semi-double. Lilac-pink.
- William Robinson**. Double. Deep red in bud, expanding to light crimson.

*These varieties are the only ones available in 4 to 5 ft.

All French Lilacs:	Each
2 to 3 ft.	\$1.25
3 to 4 ft.	1.50
4 to 5 ft.	2.00

Syringa—Lilac

Tamarix

Salix

SALIX caprea (*Goat Willow*). 12 to 15 ft. Large shrub that grows on either dry or wet soil, and valued because of its silky catkins that appear before the foliage in the spring. Winter-cut twigs may be forced indoors.

	Each
2 to 3 ft.	\$0.60
3 to 4 ft.75
4 to 5 ft.	1.00
5 to 6 ft.	1.25

**Symphoricarpos -
Coralberry; Snowberry**

SYMPHORICARPOS chenaultii (*Chenault Coralberry*). 4 to 6 ft. An improved form of Coralberry, of more upright growth, smaller leaves and coral fruit.

S. alba (*Common Snowberry*). 4 to 5 ft. Small pinkish flowers in July, followed by white berries in winter.

S. orbiculata (*Indian Currant; Coralberry*). 4 to 5 ft. A native shrub that in many localities grows in great masses. Bell-shaped white flowers in June, followed by coral berries.

Price on above 3 varieties:	Each
2 to 3 ft.	\$0.60
3 to 4 ft.	\$0.75

Tamarix

Graceful shrubs with few branches, feathery foliage and showy flowers. Will grow in very dry soil.

TAMARIX pentandra (*Five-Stamen Tamarix*). 6 to 8 ft. Beautiful blue-gray foliage, pink flowers in panicles during June and scattered throughout the summer.

T. africana (*African Tamarix*). 7 to 10 ft. The lavender flowers are borne along the branches in spring before the leaves. Strong grower and excellent for a background.

Prices of both varieties:	Each
2 to 3 ft.	\$0.60
3 to 4 ft.75
4 to 5 ft.	1.00

NEW

WEIGELA, BRISTOL RUBY. (Plant Patent No. 492.) 6 to 7 ft. This new and outstanding Weigela is hardier and more vigorous than any red Weigela to date. Makes a shapely, thrifty plant with attractive rich green foliage. Blossoms a soft ruby-red shading to garnet-crimson.

	Each
18 to 24 in.	\$1.00
2 to 3 ft.	1.50
3 to 4 ft.	2.00

Weigela,
Bristol Ruby

Weigela

Hardy, free flowering shrubs, 4 to 6 feet, of spreading habit with bell- or trumpet-shaped flowers. Thrive in moist soil, and will grow in partial shade.

WEIGELA candida (*Snow Weigela*). The best white.

W. desboisi (*Desbois Weigela*). Rose-pink; free bloomer.

W. floribunda. Good red. Superior to Evo Rathke.

W. florida. Delicate pink.

All Weigelas:	Each
2 to 3 ft.	\$0.60
3 to 4 ft.75

Viburnum

(The Snowballs)

Viburnum carlesii (*Korean Spice Viburnum*). 3 to 4 ft. A notable distinct shrub with rounded, leathery foliage and waxy pink flowers. Their very delightfully fragrant blossoms unfold with the leaves in spring. It is a real aristocrat and should be in every garden where quality is appreciated.

	Each
2 to 3 ft., B&B	\$2.50
3 to 4 ft., B&B	3.00

V. burkwoodii. See page 8.

V. dilatatum (*Linden Viburnum*). 6 to 8 ft. A very decorative Chinese variety with large clusters of white flowers followed by persistent red fruit.

V. lantana (*Wayfaring Tree*). 8 to 10 ft. A vigorous shrub with soft, heavy leaves and large clusters of white flowers in May. Red berries turn black as they ripen.

V. opulus (*European Cranberry Bush*). 8 to 10 ft. White flowers in May. Its bright berries attract birds in midsummer, and its color effect in the fall is brilliant.

V. opulus roseum (*Common Snowball*). 8 to 10 ft. The old-fashioned variety, well known to all. In May the balls of pure white flowers cover the bush.

V. prunifolium (*Black Haw Viburnum*). 10 to 12 ft. A large, bushy shrub or small tree with horizontal, twiggy branches and dark green leaves which color brilliantly in the fall. White flowers borne in flat clusters followed by smooth, glaucous bluish black fruit. A valuable variety.

V. rhytidophyllum. See page 8.

V. sieboldii (*Siebold Viburnum*). 8 to 10 ft. A vigorous, hardy shrub with stout, spreading branches. Large, dark green, shiny leaves. White blossoms followed by pink berries which change to bluish black.

V. tomentosum sterile (*Japanese Snowball*). 6 to 8 ft. The pure white flowers are borne among the clean, pleated, healthy foliage, making it one of the showiest and most beautiful. Fine for specimen or mass planting.

V. trilobum (*American Cranberry Bush*). 10 to 12 ft. A desirable variety grown primarily for its large, red, conspicuous fruit, persistent throughout the fall.

V. wrightii (*Wright's Viburnum*). 6 to 8 ft. An excellent, upright shrub with rounded, serrated leaves. Blossoms are white in spring followed by compact clusters of brilliant red fruit.

All Viburnums except as noted:	Each
2 to 3 ft.	\$0.75
3 to 4 ft.	1.00
4 to 5 ft.	1.50

Vitex

VITEX latifolia (*Chaste Tree*). A beautiful late blooming shrub with lilac-blue spikes similar to Butterfly Bush. Graceful, showy, and should be planted more.

	Each
2 to 3 ft.	\$0.60
3 to 4 ft.75

Hedges The Friendly Way to Fence

A thrifty, green hedge gives more character and beauty to home grounds than any fence ever devised. The first cost is usually less than an ordinary fence and trimming less expensive than painting. A hedge is an effective boundary marker, a wall of living green that protects the world within from the world without. The different hedge plants here listed are adapted to a variety of uses—and the plants themselves are in every way Hillenmeyer standard.

All Privet hedges should be cut back at least one-third after planting.

Chinese Privet (*Ligustrum Sinense*)

A rapid, semi-evergreen, loose growing plant that is desirable for hedge or screen. It prunes beautifully and can be kept to almost any height desired. When kept closely clipped the leaves are quite small and look almost like Boxwood. Occasionally freezes to the ground during a severe winter but always comes back with renewed vigor.

	25	50	100
12 to 18 in.	\$2.50	\$4.00	\$ 8.00
18 to 24 in.	3.00	5.00	10.00
2 to 3 ft.	3.50	6.00	12.00
3 to 4 ft.	4.50	7.50	15.00

California Privet (*Ligustrum Ovalifolium*)

Upright in growth, dark, thick, almost evergreen foliage and one of the most popular hedge plants. Can be pruned easily and does not require clipping as often as the Chinese Privet and is somewhat hardier.

Ibodium Privet (*Ligustrum Ibodium*)

This comparatively new Privet has proven hardy under the severe tests of the past few years. It has many characteristics of the California Privet though not as evergreen, and is as hardy as its other parent, the Ibota Privet. This superior Privet is a welcomed addition since it can be grown and sold at the price of California Privet.

PRICES ON CALIFORNIA AND IBODIUM PRIVET

	25	50	100	1000
12 to 18 in.	\$2.00	\$3.00	\$6.00	\$45.00
18 to 24 in.	2.50	4.00	8.00	60.00
2 to 3 ft.	3.00	5.00	10.00	80.00
3 to 4 ft.	3.50	6.00	12.00	100.00

Plant above Privet 6 to 12 inches apart.

Fragrant Bush Honeysuckle (*Lonicera Fragrantissima*)

One of the most satisfactory tall-growing screen or hedge plants. We do not recommend it where you want to keep it under 3½ to 4 feet. It is strong, vigorous, hardy, dense and holds its foliage well into the winter. The small, cream, bell-shaped blossoms appear in early spring and are quite fragrant. Normally growing into a hedge 6 to 12 feet. Requires little pruning and will thrive in almost any soil. Whether kept pruned or permitted to grow naturally, it is one of our most useful shrubs to screen out objectionable views or to give privacy to your property. Plant 12 to 24 inches apart, depending on the density desired. **Shorten back at least one-half after planting.**

	10	50	100
18 to 24 in., 2 canes or more	\$2.00	\$ 7.50	\$15.00
2 to 3 ft., light, 3 canes	2.50	10.00	20.00
2 to 3 ft., heavy, 4 canes or more	3.00	12.50	25.00

Japanese Barberry (*Berberis Thunbergi*)

Each year sees an increased use of Japanese Barberry as a hedge plant. It is graceful, ornamental, serviceable, and hardy—four points that place it at the top of the list. The foliage unfolds in early spring, followed by yellow flowers, and later by red berries that remain all winter. In autumn the whole plant assumes a red tone. The drooping branches are thickly set with small spines that will turn cats or dogs. Japanese Barberry is excellent for foundation planting or for massing in corners. It thrives in bright sun and does well in shade.

	10	50	100
12 to 15 in.	\$2.50	\$10.00	\$20.00
15 to 18 in.	3.00	12.50	25.00

Plant 18 to 24 inches apart.

Other Plants for Hedges

Many other shrubs make useful hedges, giving both protection and color. We shall be happy to give special prices on quantities and in hedge size.

Climbing and Creeping Vines

"Then the Wild Clematis Comes, With Her Wealth of Tangled Blooms."
—Goodale

These are the draperies that Nature gives us to cover porches, arbors, fences and to disguise unsightly buildings and old trees. All the varieties here named are strong growers, with either bright flowers in summer or brilliant berries in fall. Use vines freely to make the landscape more beautiful. They thrive almost anywhere, cost little, and give a large return in comfort and pleasure.

Campsis Radicans

(Trumpet Creeper)

A vigorous, woody vine, bearing scarlet flowers followed by long pods. It is a native of this section, easy to establish, and grows luxuriantly. Valuable for covering old walls, trees, stumps, etc. 50c each; 5 for \$2.00.

Celastrus

CELASTRUS scandens (*American Bittersweet*). An unusually attractive native vine because of its showy red berries in the fall and early winter. Vigorous. 50c each; 5 for \$2.00.

Clematis Jackmani

Lonicera Japonica Halliana

Hedera

HEDERA helix (*English Ivy*). The most popular evergreen vine. Has large, deep green, glossy foliage, and is unexcelled for covering walls in shady and cool places. Can be sheared into an edging along walks, covering for graves, or used as a most satisfactory ground cover under trees or in shady places. Strong vines. 30c each; 4 for \$1.00; \$20.00 per 100.

Polygonum Auberti

Celastrus Scandens

Lonicera

LONICERA japonica halliana (*Hall's Japanese Honeysuckle*). An evergreen twining vine that is so much used to cover fences and trellises. Blooms continuously, is fragrant, and very easy to establish. Used largely to hold roadside banks from erosion, and will flourish in poor soil. 25c each; 5 for \$1.00.

L. sempervirens (*Trumpet Honeysuckle*). Attractive, trumpet-shaped flowers of bright scarlet. 50c each; 5 for \$2.00.

Wistaria Sinensis

Post, Packing and Insurance, Add 10%.

Parthenocissus

PARTHENOCISSUS quinquefolia (*Virginia Creeper*). The five-leaved Ivy that is valuable for covering walls, old trees, fences, etc. It will grow anywhere and colors brilliantly in the fall. 50c each; 5 for \$2.00.

P. tricuspidata (*Boston Ivy*). The best of the self-clinging vines. Foliage is deep green, and very dense, covering any object completely. Colors beautifully in the fall. Slow to start, but vigorous when established. 50c each; 5 for \$2.00.

Polygonum

POLYGONUM auberti (*Silver Vine Fleecflower*). A quick-growing vine with small, attractive foliage. The flowers are very small and lacy and when the plant blooms it is a perfect mass of silvery white; there is no other vine producing anything like the same effect. Blooms from August to frost. 75c each; 5 for \$3.25.

Pueraria

PUERARIA thunbergiana (*Thunberg Kudzu Bean*). The most rapid growing, twining vine known today. It is marvelous how it will cover fences, pergolas, or similar objects. The large, purple flowers are sweetly scented. Belongs to the Pea family, and the foliage is dark green. 50c each; 5 for \$2.00.

Wistaria

WISTARIA sinensis (*Chinese Wistaria*). A rampant, clinging vine that has the robust vigor of a wild Grape and the matchless beauty of a rare exotic. Flowers in large, drooping clusters. There is so much complaint of Wistaria not blooming we are offering plants that are grafted from blooming wood. Wistaria always needs to be well established to bloom freely. **Purple and White.** 75c each; 5 for \$3.25.

Vinca Minor

(*Periwinkle or Trailing Myrtle*)
A trailing evergreen plant used as a ground cover under trees or other shady situations. 25c each; 5 for \$1.00.
Larger quantities priced on request.

HILLENMEYER *Kentucky Grown Fruit Trees*

Fruits—The Money-Makers are Coming Back to Southern Farms and Gardens

Wisely, many are again planting fruits. Changes during the past few years have shown clearly that farmers and gardeners who had a few bearing fruit trees were making money—or if they did not sell the fruit, they certainly did not have to buy at the store or on the market at high prices. So, the man who "raised his own" was ahead any way you look at it.

For many years we have given special attention to fruit trees and small fruit plants. This year we offer with great pride and confidence our Kentucky-grown trees, produced with the utmost care and skill, from fruiting trees of known parentage. Hillenmeyer trees are good trees, honest trees, and sold direct from the nursery—not by agents

whose commission you pay without getting a penny's worth of added value in the stock. As we sell direct to you, we do not ask fancy prices.

We propagate our fruits under careful conditions, taking every precaution to have them true to name, for we believe dependability of variety is our very best sales argument. We guarantee every variety to be as described and hold ourselves ready to replace, without charge, any tree that accidentally proves untrue to name. In addition to this dependability, our trees are suited to nearby conditions as we test all varieties before offering them for sale.

CHERRIES

Not difficult to grow, but the trees do best in well-drained, rich soil. The sour varieties grow more readily than do the sweets, but you can have both if the location is satisfactory. Be sure to plant the trees as soon as they arrive. Press the soil firmly around the roots; tramp it hard.

Cluster and Sub-Acid Varieties

You may plant one of these varieties and you will be rewarded. This group seldom fails to bear a good crop. They are self-fertile.

Early Richmond. This old standard Cherry has been the favorite for years. The fruit, borne in clusters, is tart and very valuable for canning, pies, etc. Yields nearly every year and reddens the tree with its wonderful crop. It succeeds wherever Cherries will grow and is one of the earliest.

Montmorency. Gradually supplanting Early Richmond because of its size. Except for being a little larger and later it is practically the same. Not quite as acid. Good to eat from hand. The tree is hardy, blooming late, and frequently will make a crop when the sweet varieties fail. The most popular of all Cherries.

Sweets or "Heart" Varieties

This group grows luxuriantly, makes a fine showing for a few years, and then may die if not in congenial soil. The following varieties are the hardiest of the group. You should plant two varieties of sweet Cherries for satisfactory pollination.

Black Tartarian. Perhaps the most popular of the sweet varieties. Fruit is large, black, and heart-shaped. High quality. The tree is vigorous in suitable soil.

May Duke. Somewhat more acid than the other sweet Cherries but of excellent quality and good to eat from the tree. Tree vigorous, medium size and productive.

Napoleon (Royal Anne). Large; yellow, tinged with red; firm. The most popular and best light colored Cherry for this section.

Montmorency Cherries

Talbert Apricot

Apples

No other fruit is so dependable and generally desirable as the Apple. They will thrive in almost any well-drained soil. Their period of ripening extends from early July until frost and they can be kept through the entire winter. For family use there is no other fruit so indispensable. With moderate care they will pay a handsome return on your efforts and investment. We have kept our list of varieties up to date and you can plant any of them with confidence. **Arranged in order of ripening as to season.**

Winter Apples

JONATHAN. An early bearing and long keeping Apple; red; medium size, quality good. Tree never large, but productive. September 15-20.

RED DELICIOUS. As this extra red strain is such an improvement on the old Delicious we are propagating it entirely. When you ask for Delicious we give you this red strain at no extra cost. Fruit large, uniform size, and highest quality. Distinguished by the five lobes on the blossom end. Good for home or market. September 20-30.

YELLOW DELICIOUS. A yellow type of the old standard red Delicious which has become deservedly popular throughout the country. Bears young and of highest quality. Sept. 30 to Oct. 5.

BALDWIN. Red; large; good quality. Tree vigorous, highly regarded for eating and cooking. The commercial Apple of the East. October 1-5.

RED STAYMAN. Dark rich red. Fruit large, good quality and keeper; early to come into bearing and productive. We think this the outstanding winter Apple for Kentucky. As the red variety is an improvement over ordinary Stayman, we are propagating it entirely and filling all of our orders from this selected strain. October 5-10.

TURLEY WINESAP. A seedling of Winesap which it somewhat resembles. Conical, rich red and of highest quality. A recent introduction, bears early and regularly. October 10-15.

ROME BEAUTY. Large; red, tender, sub-acid. Early bearer and productive. A popular kind in most sections. October 12-15.

YORK IMPERIAL. A late keeping commercial Apple, shaded red on yellow skin. Flesh firm. Tree healthy. Regular and heavy bearer. Fruit sometimes lop-sided. Plant for profit or for home. October 15-20.

Summer Apples

CLOSE. A new, early, red variety of outstanding promise both for home and commercial plantings. Ripens a few days ahead of Transparent. Hardy and bears when quite young. July 1-5.

EARLY TRANSPARENT. Waxy yellow; tart; excellent. Very early bearer; productive. Valuable for either home or market. Susceptible to blight on rich soil. July 5-6.

LODI. The best description of this variety may be to say that it is a larger, later Transparent. Pale yellow, tart, and ripens about a week later. Tree vigorous. Many think it will supplant Transparent as a commercial variety. July 5-10.

DUCHESS. (Often called "Oldenburg"). An old outstanding variety, productive, and best of its season. Ours is the "red" strain. Early bearing. July 10-15.

ANOKA. Medium size, red striped and of good quality. The outstanding feature of this Apple is the earliness at which it bears. Sometimes produces fruit in the nursery row. Excellent for small areas. July 15-20.

GOLDEN SWEET. Yellow. The best sweet we know. Vigorous grower; annual bearer, very productive. Hasn't a fault. July 20-30.

HYSLOP CRAB. The very best hardy Crab, producing a heavy crop of bright red tart fruit that is unexcelled for culinary purposes. Bears early. August 15-20.

POLLY EADES. A Kentucky developed variety; while not well known, is superior to Maiden's Blush; yellow with slight blush. Bears early and quite productive. Plant on our recommendation and you will never regret it. August 15-20.

Fall Apples

WEALTHY. Large; shaded dark red; quality good, tender. Productive. Early to bear, and most satisfactory. Ripens over a long period and should be in every orchard. August 1 to September 1.

McINTOSH. A fine fall or early winter kind that has won its way because of its productiveness and extra high quality. Bright red; smooth. Plant it liberally in Kentucky. August 20-25.

PADUCAH. A Kentucky product which very much resembles the Rome Beauty. About two or three weeks earlier, with more color. Prolific and a regular bearer. This variety stands at the top of the list as to production at the Kentucky Experiment Station. September 5-10.

GRIMES GOLDEN. One of the best fall Apples. A recent survey showed this the most popular Apple of any season. Fruit golden yellow. Matures early and is a heavy bearer. This variety is troubled with canker, shortening the life of the tree. We also offer "Double Grafted" Grimes Golden, which is a longer lived tree, at 25c extra. September 15-20.

Hillenmeyer's Apples are True to Name—the Best to be Had and They Cost No More.

Peaches

A home garden without Peaches? Can you imagine such a thing? Just think what you are missing—luscious fruit from late June to mid-October if you select an early, a midseason, and a late. One tree of each is better than none, but if you have space, plant five of each class. For a commercial orchard you need a special selection and several varieties—better write and ask our advice.

Planting and Care

The Peach is the quickest maturing of fruit trees, often bearing the second year after transplanting. Plant only in well-drained soil but otherwise follow methods recommended for other fruit trees.

When planting, prune rather severely, cut all side branches to 6 to 8 inches and head low. The tree gets top-heavy if allowed to develop a high head. Subsequent orchard pruning consists of shortening the terminal growth and keeping the tree compact and shapely.

Borers which live right below the ground line and frequently girdle the trunk should be removed annually. A new chemical, Paradichlorobenzine (PDB), may be used to control this pest. Our orchard growing and nursery experience is always at your service. Write us your questions and we will try to help you.

Arranged In Their Order of Ripening

MIKADO. (Free.) The best and most popular very early Peach to date. Medium size, round, yellow with red blush and of good quality. For best results should be planted with other varieties for cross-pollination. July 5-10.

GOLDEN JUBILEE. (Free.) A new, large, early Peach, highly recommended by the Kentucky Experiment Station and other leading authorities. Yellow with a distinct blush. Quality fine. July 15-20.

OTHELLO. (July Heath.) (Cling.) A new and better cling which we are growing instead of the old standard Heath. Has distinct blush, white flesh of good quality and is highly recommended by the Kentucky Experiment Station. July 25.

SOUTH HAVEN. (Free.) Better color and quality than Elberta. Large, and ripens 10 to 14 days earlier. Has been much harder than other yellow Peaches and because of our tests we recommend it highly. August 5-10.

HALE-HAVEN. (Free.) An excellent Peach introduced by the Michigan Experiment Station. A cross between J. H. Hale and South Haven. Large, mid-season, yellow with blush. Good quality tree, healthy and hardy. August 5-10.

VALIANT. (Free.) An extra hardy outstanding yellow variety of good quality. August 5-10.

REDSKIN. (Free.) A new introduction from the Maryland Experiment Station that has great promise. Round, yellow, with little or no color near pit. Overlaid with deep red blush. Large, hardy and firm. August 5-10.

BELLE OF GEORGIA. (Free.) White, with decided blush; excellent quality. Heavy and regular bearer. The best white-fleshed Peach for home or market. August 10-12.

ELBERTA. (Free.) Fruit large, yellow, shaded with deep red. Elberta has been the standard Peach for years, and is just as good today. More than 80 per cent of commercial plantings are of Elbertas. August 10-12.

J. H. HALE. (Free.) Fruit large, yellow, almost covered with red; more highly colored than Elberta; flesh firm, melting, and of best quality. Ripens August 10-15.

AFTERGLOW. (Free.) This new, beautiful, yellow-flesh Peach is well named because the soft amber-red covers the entire fruit. Hardy, excellent quality and very productive. The only Peach we have found worthy to list, ripening after Elberta. August 15-20.

PEACH PRICES:

	Each	5	50
3 to 4 ft.	\$0.75	\$3.25	\$27.50

Pears

This old standard fruit is still being planted by many. Blight is its chief enemy, and as it is worse on deep, rich soil, do not over-stimulate by feeding. Planted in the back lawn it will make a beautiful tree in foliage, blossom and fruit.

BARTLETT. August 15. The favorite eating Pear of America. Large, beautiful yellow with soft blush; high flavor. Tree bears quite young. On account of its popularity everywhere it is the most sought after of the European Pears.

KIEFFER. September 10 to 15. The most popular Pear for our section. Fruit is large, golden yellow, sometimes tinted red on the sun-exposed side. Flesh is firm, crisp, juicy and for canning purposes it is especially prized. From the tree it is not good to eat, and to properly ripen, gather carefully and place in a dry place of even temperature. The quality improves and it is then desirable. For keeping longer, pack in shallow trays or wrap the fruit in paper and store in a room free from frost. In this manner it can be kept until Christmas.

LINCOLN. Blight-resistant and bears regular crops. Perfectly hardy and quality almost equals Bartlett. Season of ripening about September 1st. Plant with confidence. Considered by many the best of the Pears.

SECKEL. September 15. This small, high quality, yellowish brown Pear is one of the most popular of the September fruits. Of melting, juicy, and sugary quality (frequently called the "Little Sugar Pear"). Tree is of slow growth but lives long and is needed in every home garden.

Kieffer

Bartlett

MORE THAN 100 YEARS

... That's how long we have grown Hillenmeyer's Quality, True-to-Name Fruit Trees.

Plums

They grow almost anywhere—garden, chicken-run, or orchard. Usually the trees are loaded with fruit, so it is wise to thin when too thick. Prune same as Apples.

BURBANK. Late July. Fruit large, violet to light purple, with occasional shades of yellow. Flesh yellow, of excellent quality. For either canning or market this is the most popular kind. We believe it to be the hardiest and most prolific of the Oriental varieties.

DAMSON. A medium size, purple or blue Plum which is well known for its fine culinary uses. Damson preserve is the height of epicurean delight. It bears heavily and should be in every planting where Plums are wanted.

GREEN GAGE. Another outstanding old variety. It ripens in mid-August and its medium sized, yellow-green, high quality fruit makes it a standard by which others are judged. Tree moderate grower; healthy.

OMAHA. (Hybrid.) A promising kind, vigorous in growth and free from disease. Being an American-Japanese hybrid, it inherits hardiness and productiveness from each parent. Produces great crops of coral fruit, yellow fleshed and of good quality.

STANLEY PRUNE. A large, sweet, purple Plum with much merit. Introduced by the New York Experiment Station. Annual bearer, good for home or commercial purposes and the best of the "Prune" class.

Washington Asparagus

MacDonald Rhubarb

ASPARAGUS

WASHINGTON. This is the best known variety. It is a strong grower, producing stocks of large size and of finest quality. The fact that it is rust-resistant makes it the ideal Asparagus for all. Our plants, produced on heavy soil, are superior to the little seedlings grown in sand. Every plant is graded and are large, fleshy roots that, with proper care, will be ready to cut the second year. Our plants will grow off much better than imported plants.

	25	50	100
Strong, 2-yr. plants	\$1.50	\$2.50	\$4.00

A Gift for You

To help you get the best results from your plans and plants we will send absolutely free with every order, a copy of this booklet:

"HOW TO PLANT"

The instructions are clear and cover planting, pruning, feeding, spraying, cultivating, and other details. This is a part of the service we give that you may have the greatest success and joy from Hillenmeyer stock. If other questions arise from time to time, write us—we are at your service.

HILLENMEYER'S FAMOUS KENTUCKY BLUE GRASS
BLUE GRASS

Here in the heart of the famed Blue Grass Section of Kentucky, the best seed in the world is produced. Hillenmeyer Seed is of the highest quality, both as to purity and germination. Do not sow light, chaffy material of weak germination and carrying many noxious weed seeds. Why gamble with poor seed? **Plant the best.**

SUNNY LAWN MIXTURE

For sowing new lawns or where you have a thin stand we recommend our Special Lawn Mixture. This consists of Blue Grass, White Clover, and other varieties for quick effect.

SHADY LAWN MIXTURE

A scientific mixture of grasses to be used in shady locations on which the sun does not shine more than 4 or 5 hours per day.

Sow 2 to 3 lbs. to 1000 sq. ft. on thin lawn, 4 to 6 lbs. to 1000 sq. ft. on new lawn.

	1 lb.	3 lbs.	10 lbs.

PLANT FOOD AND MULCHING MATERIALS

Fertilizers and Peat Moss are Sent
Transportation Charges Collect—
Cannot be Sent by Post.

Driconure

A perfectly blended combination of Nature's products—cow manure, poultry manure and peat moss. A complete fertilizer plus a safety factor that prevents burning and over-feeding. Driconure is clean and absolutely free from weed seed, insect life, fungus and useless filler. Practically odorless, finely ground and easy to distribute. An ideal, all-organic food and soil conditioner. Use a handful or so, worked in the soil around plants when setting or 50 pounds per 500 square feet.

7 1/2-lb. bag, 75c; 50 lbs. (2 bus.), \$2.50.

Peat Moss

No other material is quite its equal for soil conditioning. It will retain 6 to 10 times its dry weight in water, and is free of all weed seeds. As a mulch, especially for Roses and perennials, it has no equal. Sold in bales of approximately 15 bushels which will cover 300 square feet 1 inch deep. Spaded in with manure it has the ability to absorb enormous amounts of fertility which the plants readily take up. Indispensable to good gardening.

POULTRY LITTER. Peat Moss is also the ideal, safe and sanitary material for bedding young poultry. \$5.00 per bale; 5 bales for \$23.75.

Vigoro

Vigoro is not just an ordinary fertilizer but a complete, balanced, scientifically prepared plant food containing all eleven of the elements necessary for proper development. Use 25 to 50 pounds per 1000 square feet on lawns, one handful to each square foot around Roses, Shrubs, and Evergreens. Water-in after applying.

10 lbs., 90c; 25 lbs., \$1.60; 100 lbs., \$4.25.

Turf Builder

This is especially made for feeding grass, though it can be used whenever a complete fertilizer is needed. It is not at all chemical but contains vegetable matter, thereby giving immediate and lasting results. Because of its concentration will go much farther than most other fertilizers. If grass is tender, "water-in." Can also be used for tree feeding and for this we recommend three (3) pounds per diameter inch. For broadcasting use 10 to 20 pounds per 1000 square feet.

25 lbs., \$2.00; 50 lbs., \$3.75; 100 lbs., \$6.50.

NO AGENTS

WE HAVE NO AGENTS who go from door to door or sell on commission. Appointments for landscape work are usually made by phone or correspondence. If you want to contact someone from our firm, please call or write. Our catalog is one of our salesmen.

Many unscrupulous and transient salesmen go about the country representing themselves as our agents. Do not believe them. While we do sell some stock to dealers, they must make their own terms as to price, collections, guarantees, etc. Since some of the material they sell often does not come from us, the way to get true-to-name Hillenmeyer stock is to buy direct.

Again, WE HAVE NO AGENTS.

Delivery

No charge for local delivery in city and subdivisions adjacent thereto. Truck delivery beyond this can usually be arranged satisfactorily, depending on quantity and distance. On orders to be shipped, prices are f. o. b. Lexington depots.

Charges for Prepaying— Within 200 Miles of Lexington

PARCEL POST. For such stock as can be sent by Parcel Post, add 10% to your order, except as noted.

If stock is over-size or too heavy we reserve the privilege to send by other carriers. If in doubt about Post please tell us how you want shipment made.

EXPRESS, FREIGHT, TRUCK. Where these services are available add 10% on everything except Shade Trees, Balled and Burlapped Plants (B&B) and Fertilizers.

ON SHADE TREES add 15% to your order.
ON BALLED AND BURLAPPED MATERIAL (B&B), add 20%.

If you order by truck be sure you have such services and give us the name of your trucking line. Also please give us your street number or rural route.

Guarantee

We guarantee every item to be true to name, up to grade and in good condition when it leaves here. As there are so many forces beyond our control, such as weather, soil and care, which may cause stock to die, we cannot be responsible for losses which occur. However, we will absolutely refund or replace without charge any stock which does not reach you in good condition, provided you report promptly and it has not been injured by public carrier.

Substitution

When out of a variety of fruit trees, small fruit or Roses, we sometimes substitute, giving you the closest to it. If this is not satisfactory, mark "No Substitutes" on your order.
